Computer Information Systems (CIS)

CIS 1000  Computer Literacy ............................. 1 Credit Hour
English/ESL Placement: Placement into ENG 1055 or higher (or placement into ESL 1011 or higher for students taking the ESL sequence of courses.)

Note: DUE TO FEDERAL REGULATION THIS COURSE MAY NOT BE ELIGIBLE FOR FEDERAL FINANCIAL AID. PLEASE CHECK WITH YOUR FINANCIAL AID OFFICE.

Students will be provided an understanding of fundamental computer concepts and personal computer operation. Students will utilize a personal computer to acquire basic skills necessary to power up a computer and access common computer programs. Topics to be covered include elementary word processing, system commands and operation, and general computer concepts. Students will be required to complete computer-based assignments outside of class. BILLABLE CONTACT HOURS: 1

CIS 1050  Personal Computer Productivity Tools ......4 Credit Hours
Equivalent: DPR 1030,DPR 1010
English/ESL Placement: Placement into ENG 1060 or higher (or placement into ESL 2510 or higher for students taking the ESL sequence of courses.)

Students will be introduced to the essentials of personal computer usage. Students will explore and utilize software products such as business graphics, Internet usage, spreadsheets, databases, and word processing. Material in this course will assist students in the use of common desktop productivity tools used by most other disciplines. Consult the footnotes in the Schedule of Classes for information on the software package being used in specific sections. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 1060  Personal Computer Spreadsheet Concepts
.............................................................................. 3 Credit Hours
Equivalent: DPR 1060
English/ESL Placement: Placement into ENG 1510.

Students will use a personal computer spreadsheet package to solve problems and develop solutions that lend themselves to the spreadsheet environment. Topics covered include spreadsheet menus, macros, charting, importing data files, graphics facilities, data tables and creating web pages. Consult the coursenote in the Schedule of Classes for information on the software package being used in specific sections. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 3

CIS 1070  Personal Computer Presentation Concepts
.............................................................................. 3 Credit Hours
English/ESL Placement: Placement into ENG 1510.

Students will utilize a personal computer presentation package to create software-based slide show presentations. Topics covered include planning an effective slide presentation; creating and editing a presentation by adding, deleting and modifying slides and slide content; creating tables and charts; using design templates; adding transition, animation and sound effects; and inserting clip art. Linking and embedding objects from other programs, setting up a self-running presentation and setting up a presentation to run on another computer will also be covered. Consult the Schedule of Classes for information on the software package being used for the course. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 3

CIS 1080  Personal Computer Database Concepts .....3 Credit Hours
Equivalent: DPR 1080
English/ESL Placement: Placement into ENG 1510.

Students will use a personal computer database package to implement database solutions in common application areas involving personal computers. Topics covered include relational database concepts, menus, queries, report writing features, screen design, importing and exporting data files, macros and creating hyperlinks and web pages. Consult the course notes in the Schedule of Classes for information on the software package being used in specific sections. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 3

CIS 1090  Web Graphic Concepts ............................3 Credit Hours
English/ESL Placement: Placement into ENG 1510.

This course will introduce students to the fundamental concepts, techniques and tools for understanding, creating and manipulating graphics (image files) suitable for use on web pages. Students will learn to use a graphics editor to create image based web components such as banners, buttons, GIF animation, splash page graphics, montages and will also learn to integrate those components to create an overall interface for a website. Students will learn about file formats, image compression techniques, web page typography, color choices for web pages as well as layout and composition for web-based projects. Students will create a web-based portfolio of all the graphics created during the course of the semester. BILLABLE CONTACT HOURS: 3

CIS 1100  Fundamentals of Information Systems .....4 Credit Hours
English/ESL Placement: Placement into ENG 1510.

This course provides an overview of business information systems and aims to present the central information systems principles, and demonstrate how they form an integral part of modern organizations. Topics include computer hardware and software fundamentals, use of software packages, an introduction to the Internet, systems analysis, the design of management information systems, as well as the impact of computers on business and society. The students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 1200  Introduction to Database Systems ..........4 Credit Hours
Equivalent: DPR 1200
English/ESL Placement: Placement into ENG 1510.

This course will focus on the fundamentals of database systems. Students will study the basics of database vs. file management systems; functions, components, and personnel involved in a database; database, client-server, and transaction processing architectures; and relational data models and operations. Students will also study business requirements analysis, perform data definition, manipulation, and queries using basic SQL, create forms and reports; and analyze macros, procedures and triggers. Concepts of database planning, design, and administration fundamentals, data warehousing, and data mining will be covered. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 1295  Voice and Data Cabling ........................4 Credit Hours
English/ESL Placement: Placement into ENG 1510.

Students will become familiar with cabling issues related to data and voice connections, media (copper and fiber) and transmissions practices, and cabling customer support. This course stresses documentation, design and installation issues, laboratory safety and on-the-job safety, as well as working effectively in group environments. BILLABLE CONTACT HOURS: 4
CIS 1300  Networking Concepts ................................. 4 Credit Hours  
Equivalent: CIS 2710  
English/ESL Placement: Placement into ENG 1510.  
Students will explore the components of networks and network designs. 
Communications hardware and the interconnection of servers and 
clients within LANs and WANs will be presented. Network architectures, 
standards, protocols and access methods used within intranets and the 
Internet will be described. The functions of network operating systems 
such as Windows Server, Unix, and Novell NetWare will be explored. 
Centralized computing, client/server and peer-to-peer environments, their 
services and their program-to-program communication protocols will be 
presented. Data security and system component protection will be studied. 
Students will be required to complete computer-based assignments inside/ 
outside of class. BILLABLE CONTACT HOURS: 4  

CIS 1305  CCNA Studies I: Introduction to Networks .4 Credit Hours  
English/ESL Placement: Placement into ENG 1510.  
This course is the first of four courses training students on the topics 
tested in CCNA (Cisco Certified Network Associate) certificate. Introduces 
the architecture, structure, functions, components, and models of the 
Internet and computer networks. The principles of IP addressing and 
fundamentals of Ethernet concepts, media, and operations are introduced 
to provide a foundation for the curriculum. By the end of the course, 
students will be able to build simple LANs, perform basic configurations 
for routers and switches, and implement IP addressing schemes. BILLABLE 
CONTACT HOURS: 4  

CIS 1310  CCNA Studies II: Routing and Switching Essentials  
.................................................................................. 4 Credit Hours  
English/ESL Placement: Placement into ENG 1510.  
Prerequisite: CIS 1305 or consent of instructor.  
This course is the second of four courses training students on the topics 
tested in CCNA (Cisco Certified Network Associate) certificate. Describes 
the architecture, components, and operations of routers and switches in 
a small network. Students learn how to configure a router and a switch 
for basic functionality. By the end of this course, students will be able 
to configure and troubleshoot routers and switches and resolve common 
issues with RIPv1, RIPv2, single-area and multi-area OSPF, virtual 
LANs, and inter-VLAN routing in both IPv4 and IPv6 networks. BILLABLE 
CONTACT HOURS: 4  

CIS 1320  CCNA Studies III: Scaling Networks .......... 4 Credit Hours  
English/ESL Placement: Placement into ENG 1510.  
Prerequisite: CIS 1310  
This course is the third of four courses training students on the topics 
tested in CCNA (Cisco Certified Network Associate) certificate. Describes 
the architecture, components, and operations of routers and switches in 
a large and complex network. Students learn how to configure routers and 
switches for advanced functionality. By the end of this course, students will 
be able to configure and troubleshoot routers and switches and resolve 
common issues with OSPF, EIGRP, STP, and VTP in both IPv4 and IPv6 
networks. Students will also develop the knowledge and skills needed to 
implement DHCP and DNS operations in a network. BILLABLE CONTACT 
HOURS: 4  

CIS 1330  CCNA Studies IV: Connecting Networks .... 4 Credit Hours  
English/ESL Placement: Placement into ENG 1510.  
Prerequisite: CIS 1320  
This course is the fourth of four courses training students on the topics 
tested in CCNA (Cisco Certified Network Associate) certificate. Discusses 
the WAN technologies and network services required by converged applications in a complex network. The course enables 
students to understand the selection criteria of network devices and 
WAN technologies to meet network requirements. Students learn how to 
configure and troubleshoot network devices and resolve common issues 
with data link protocols. Students also develop the knowledge and skills 
needed to implement IPSec and virtual private network (VPN) operations 
in a complex network. BILLABLE CONTACT HOURS: 4  

CIS 1400  Web Design I ................................. 4 Credit Hours  
Equivalent: CIS 1510,CIS 1110  
English/ESL Placement: Placement into ENG 1510.  
This course focuses on designing and coding internet web pages using 
HTML5. The student will develop web pages by designing, entering, and 
testing code using this standard (with a simple text editor) rather than by 
using web development tools. Topics include - HTML5 element structure, 
web forms, multimedia, style sheets (CSS3) to apply formatting and layout 
characteristics in addition to applying special effects. This course will also 
ineclude an introduction to the JavaScript programming language. Students 
should be familiar with the basics of both word processing and Windows 
file management techniques before enrolling in this course. BILLABLE 
CONTACT HOURS: 3  

CIS 1440  JavaScript Programming for Websites ...... 4 Credit Hours  
Equivalent: CIS 1125  
English/ESL Placement: Placement into ENG 1510.  
Prerequisite: CIS 1420  
This course introduces the student to the fundamentals of JavaScript as a 
client-side scripting language for the purpose of developing dynamic 
Web-based applications that run within a Web browser. Emphasis is 
placed on programming techniques and Web technology. Topics include 
functions, data types, operators, strings, arrays, control structures, form 
validation, event handling, the Document Object Model, and debugging. 
Students should be familiar with fundamental computer usage, word 
processing, and HTML prior to enrolling in this class. Students will be 
required to complete computer-based assignments inside and outside of 
class. BILLABLE CONTACT HOURS: 4
CIS 1500  Introduction to Programming (Java) ........ 4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Students should have elementary Algebra skills and be familiar with both elementary word processing and Windows file management techniques prior to enrolling in this class. Students will be introduced to
the fundamental techniques and syntax for understanding, designing,
constructing, debugging, and testing object-oriented programs by studying the Java programming language. The structured programming basics of
process, selection and iteration will be covered as well as primitive and
complex data typing, methods, parameters and input/output. The basics
of graphical user interface (GUI) programming such as event handling,
windows and widgets will be introduced. Fundamental object-oriented
concepts of classes, methods, abstraction, encapsulation and inheritance
will also be introduced. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT
HOURS: 4

CIS 1512  Principles of Software Engineering ........ 3 Credit Hours
English/ESL Placement: Placement into ENG 1510.
This course is focused on formal methods and approaches used in the
design, development, testing and maintenance of computer software.
Each stage of the software development life cycle (SDLC) will be studied
in detail. Topics such as low-level design, high-level design, modeling
with UML (Unified Modeling Language), iterative development models,
rapid application development (RAD), formal testing methods, incremental
deployment, formal metrics, as well as appropriate use of associated tools
will be covered with practical applications. Students will be required to
complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 3

CIS 1550  Introduction to Secure Programming ........ 3 Credit Hours
English/ESL Placement: Placement into ENG 1510.
This course presents cybersecurity content related to analyzing software
risks, understanding likely points of application attack, and making
preliminary decisions about how software applications mitigate attack.
The student will learn how to identify systemic threats in any deployment
environment, understand the vulnerabilities of common software
applications, and how to construct software that are responsive to
identified vulnerabilities. BILLABLE CONTACT HOURS: 3

CIS 1600  Fundamentals of Cybersecurity ............ 4 Credit Hours
Equivalent: CIS 2839,CIS 2839
English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1300
This course is designed for aspiring security professionals, system or
network administrators, or other information technology professionals who
want to learn about computer security. Students will be well prepared for the
Security+ Exam after taking this class. This course focuses on General
security concepts, Communication security, Infrastructure security, Basics of Cryptography, and Operational Organizational security. Students will be
required to complete computer-based assignments inside and outside of
class. BILLABLE CONTACT HOURS: 4

CIS 1610  Data Security .................................. 4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1600
This course is focused on the structure of data and database systems,
their vulnerabilities to cyber attacks, and the proper techniques required
to protect these systems from damage. Material covered will include:
analysis of database-related malware; data system architecture;
database system installation and configuration; data access controls
and authentication; data security tools and devices; and security testing
and auditing. Students will be required to complete computer-based
assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 1620  Introduction to Cryptography ............ 4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1600
This course is focused on basic techniques of encryption and decryption
and their application to computer security. Topics covered will include:
basic number theory and finite field arithmetic used in cryptography;
symmetric ciphers; asymmetric ciphers; block and stream ciphers;
implementation of popular encryption algorithms (e.g., AES); hash
algorithms; digital signatures; and key management and distribution.
Students will be required to complete computer-based assignments inside
and outside of class. BILLABLE CONTACT HOURS: 4

CIS 1630  Security Policy, Legal, Ethics and Compliance
........................................................................ 3 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1600
This course provides a comprehensive introduction to the identification,
selection, assessment, and continuous monitoring of management controls that provide a cyber security governance structure throughout
an organization and its supply chain. The course will emphasize security policies and frameworks, their organizational implications, to
the psychology, ethics, and legal considerations of their implementation.
BILLABLE CONTACT HOURS: 3

CIS 1720  Multimedia Data Management ............ 4 Credit Hours
Equivalent: CIS 1001
English/ESL Placement: Placement into ENG 1510.
This course will give students a broad foundation in issues surrounding
multimedia, including the role of and design of multimedia systems
which incorporate digital audio, graphics and video, underlying concepts
and representations of sound, pictures and video, data compression,
transmission and storage, integration of media, multimedia authoring,
and delivery of multimedia. Course will also include industry overview, societal issues, cultural implications, visual literacy and career opportunity. The
students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 1721  Web Design II .................................. 3 Credit Hours
English/ESL Placement: Placement into ENG 1510.
This course will provide students with intermediate to advanced skills in
web publishing focusing on abilities to design web pages with variations
in web browsers in mind. Students will continue to work with a web design
editing tool and create pages that include forms, validation, and cascading
style sheet based design layout. Students will create a website that is
ADA (American Disabilities Act) compliant. Students should be familiar
with elementary word processing and MS Windows file management
techniques prior to enrolling in this class. Students will be required to
complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 3

CIS 1722  Web Animation .............................. 3 Credit Hours
English/ESL Placement: Placement into ENG 1510.
This course will provide introductory level knowledge of effectively working
with vector based design applications aimed at the creation of animation,
games, and interactive components for use on the internet. Students will
focus on the creation of basic animation and navigation components for
use on web sites as well as for projects aimed at offline use. Students
taking this course should have basic Windows background and general
knowledge of internet technologies. BILLABLE CONTACT HOURS: 3
CIS 1801  Special Topics I: Network Remediation ...... 3 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: The prerequisites for a specific special topics section will depend on the content of that section. See footnotes in the current Schedule of Classes for associated prerequisites.
Network Remediation. BILLABLE CONTACT HOURS: 3

CIS 1802  Special Topics I: Introduction to Cybersecurity and Risk Management .................................................. 3 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: The prerequisites for a specific special topics section will depend on the content of that section. See footnotes in the current Schedule of Classes for associated prerequisites.
Introduction to Cybersecurity and Risk Management. BILLABLE CONTACT HOURS: 3

CIS 1803  Special Topics I ........................................... 1-4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: The prerequisites for a specific special topics section will depend on the content of that section. See footnotes in the current Schedule of Classes for associated prerequisites.
Students will be introduced to a particular contemporary topic or issue in information science that is relevant in today's environment. See footnotes in the current Schedule of Classes for current topics. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 1 - 4

CIS 1804  Special Topics I: Macro Media Director ..... 4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: The prerequisites for a specific special topics section will depend on the content of that section. See footnotes in the current Schedule of Classes for associated prerequisites.
Macro Media Director. BILLABLE CONTACT HOURS: 4

CIS 1805  Special Topics I: Introduction to Adobe Creative Suite CS2 ................................................................. 4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: The prerequisites for a specific special topics section will depend on the content of that section. See footnotes in the current Schedule of Classes for associated prerequisites.
Introduction to Adobe Creative Suite CS2. BILLABLE CONTACT HOURS: 4

CIS 1811  Special Topics II ........................................... 1-4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: The prerequisites for a specific special topics section will depend on the content of that section. See footnotes in the current Schedule of Classes for associated prerequisites.
Students will be introduced to a particular contemporary topic or issue in information science that is relevant in today's environment. See footnotes in the current Schedule of Classes for current topics. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 1 - 4

CIS 1812  Special Topics II ........................................... 1-4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: The prerequisites for a specific special topics section will depend on the content of that section. See footnotes in the current Schedule of Classes for associated prerequisites.
Students will be introduced to a particular contemporary topic or issue in information science that is relevant in today's environment. See footnotes in the current Schedule of Classes for current topics. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 1 - 4

CIS 1813  Special Topics II ........................................... 1-4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: The prerequisites for a specific special topics section will depend on the content of that section. See footnotes in the current Schedule of Classes for associated prerequisites.
Students will be introduced to a particular contemporary topic or issue in information science that is relevant in today's environment. See footnotes in the current Schedule of Classes for current topics. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 1 - 4

CIS 1814  Special Topics II ........................................... 1-4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: The prerequisites for a specific special topics section will depend on the content of that section. See footnotes in the current Schedule of Classes for associated prerequisites.
Students will be introduced to a particular contemporary topic or issue in information science that is relevant in today's environment. See footnotes in the current Schedule of Classes for current topics. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 1 - 4

CIS 1815  Special Topics II: Introduction to C Sharp Programming Language ......................................................... 4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: The prerequisites for a specific special topics section will depend on the content of that section. See footnotes in the current Schedule of Classes for associated prerequisites.
Introduction to C Sharp Programming Language. BILLABLE CONTACT HOURS: 4

CIS 2111  Systems Analysis and Design (UML) .......... 4 Credit Hours
Equivalent: CIS 2030,DPR 2030
English/ESL Placement: Placement into ENG 1510.
Students should be familiar with the basics of both word processing and Windows file management techniques before enrolling in this course. Students will survey and practice the techniques used by system analysts and programmers in the analysis and design of computer-based business information systems with focus on the Unified Modeling Language (UML). Both traditional and object-oriented methods will be presented. System and object-oriented development life cycles (SDLC and ODLC) and subjects in computer-aided software engineering (CASE) such as project management, requirements modeling, data flow and entity relationship diagrams (DFD and ERD) and data dictionaries are among the included topics. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 2115  Business Analysis and Processes .......... 4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1050 CIS 1060 CIS 1200 and CIS 2111.
In this course emphasis will be placed on tools and techniques to help with the analysis and process of solving business problems with technology. This course will cover process analysis, process flow diagrams, data analysis, predictive analysis and modeling, data modeling, Entity Relationship Diagrams (ERD), data dictionary, data mapping and the software tools available. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4
CIS 2120  Problem Solving and Information Technology
English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1050 and CIS 1060.
This course demonstrates how information technology impacts organizations, with an emphasis on using information technology to solve problems and introduces the need for business processes and IT alignment. Topics include main concepts of information technology at a general level, on-line collaboration tools, application software, and information literacy as applied to searching and using the Internet. In addition, students will use application software at an intermediate level and apply it to problem solving scenarios. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2151  Object-Oriented Programming (Java) ............. 4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1500
Students will be exposed to more complicated programming problems and will study the techniques and structures used to solve these problems with the Java language. Topics will include multidimensional arrays and class design using both composition and inheritance. Advanced Graphic User Interface (GUI) design and implementation techniques will be discussed. Students will be required to complete computer-based assignments inside/ outside of class. BILLABLE CONTACT HOURS: 4

CIS 2212  Project Management ............................... 4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Students should be familiar with the basics of both word processing and Windows file management techniques before enrolling in this course. This course focuses on management strategies and analysis of business information systems projects. Project management issues and techniques specific to projects will be emphasized. Emphasis is on creating plans and implementing projects that are within budget, on time, and deliver useful results. Technology and project management standards, design tools (e.g., UML), product evaluation criteria, infrastructure integration, and communication of technical implementation details will be covered in group discussion and project work. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2232  Fundamentals of System Support ............ 4 Credit Hours
Equivalent: DPR 2050
English/ESL Placement: Placement into ENG 1510.
Students will be introduced to the basic software and hardware concepts and facilities needed for simple support tasks. Topics covered include system boot sequences, disk partitioning, disk fragmentation, system configuration files, types of memory and memory management, basic OS commands and batch file construction. Emphasis is given to the Windows OS relationships and facilities. Hardware factors related to system and software evaluation, selection, purchase and installation are presented. Students will be required to complete computer-based assignments inside/ outside of class. BILLABLE CONTACT HOURS: 4

CIS 2252  Object-Oriented Programming (C++) .......... 4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Students should have a basic understanding of general programming concepts and techniques prior to enrolling in this class. Students will be instructed in the syntax and semantics of the ANSI C++ language. Topics covered include control structures, arrays, pointers, strings, dynamic memory management, class definition and object-based development, file I/O, overloading, exception handling, and template libraries. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 2313  E-Business and E-Commerce ................. 4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Students should have a basic knowledge of Internet technologies before enrolling in this course. Introduction is provided to a broad range of theories, practices, standards, and procedures related to the strategic implementation of e-commerce systems aimed at supporting one or more organizational business initiatives. A series of topics will be presented and cases analyzed that teach the student material ranging from: e-commerce business models, e-commerce technologies, supporting standards, to ecommerce analysis and design methodologies. The students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 2333  Web System Administration .................... 4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1300
This course focuses on the operation and administration of Web application servers such as Apache HTTP, IIS, Tomcat and WebSphere. Students will study the basic structure and function of Web servers as well as the common tasks and services performed by administrators. Topics include Web protocols and related networking; Web server installation and configuration; integration with other essential services such as email, database management, file transfer, domain name services, and authentication; security; monitoring and performance; and virtualization. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2353  Data Structures ...................................... 4 Credit Hours
Equivalent: DPR 2810
English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1500
Students will investigate the programming techniques and theories involved in implementing linked lists, queues, stacks and tree structures. Recursion, searching techniques and sorting algorithms will also be considered. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2434  Introduction to Linux and Unix Administration ........................................... 3 Credit Hours
Equivalent: CIS 2332
English/ESL Placement: Placement into ENG 1510.
Students should be familiar with elementary word processing and basic computer concepts prior to enrolling in this course. This hands-on class covers the concepts related to Linux/Unix installation and system administration. Students will install and administer a Linux/Unix operating system using a virtual machine software product. It is intended for students who plan to work as Linux/Unix system administrators or for those who plan to take one or more certification tests as part of their professional preparation. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 3
CIS 2454  Web System Development (PHP, Java) ...... 4 Credit Hours  
Equivalent: CIS 1930

English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1500 or CIS 2151

This course focuses on design and implementation techniques for Web-based application software. Server-side software design and development techniques associated with Web Developer job skills will be emphasized. Topics to be covered will include: Web application architecture; design patterns and application frameworks; PHP language basics; Java technologies for server-side Web development; database access; Extensible Markup Language (XML) and Asynchronous JavaScript and XML (AJAX)-based request processing; and Web application security. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2515  Database Design and Management with Oracle SQL

Equivalents: DPR 2830

English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1200 or consent of instructor.

This course will focus on design and management of database environments using Oracle SQL and associated Oracle technologies. Topics include enterprise information resource planning and object-oriented and entity-relationship data modeling methodologies, normalization and the relational model, logical and physical database design, and implementation, population and processing of a relational database for data access, report generation, database definition, data manipulation, and access control. Oracle-specific materials used in this course are designed to prepare students for an Oracle Database SQL exam which is the first exam required to become an Oracle Certified Associate or Oracle Certified Professional. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2535  Microsoft Windows Server Administration .3 Credit Hours

English/ESL Placement: Placement into ENG 1510.

Students should be familiar with the basics of both word processing and Microsoft Windows file management techniques and basic hardware, software, and network operating system, architecture, and protocol concepts needed for simple support tasks prior to enrolling in this course. Concepts of electronic business communications and local area networks will be covered. The Microsoft Windows Server operating system will be used and studied in this course. Installation of network operating system, setup of users and groups, files and folder trustee rights, and console management will be covered. Students will be required to complete computer-based assignments inside/outside of class. This course covers material in and prepares students for the first part of Microsoft's MCSA and MCSE certification tracks. BILLABLE CONTACT HOURS: 3

CIS 2555  Web System Development (ASP.NET, C#) ...... 4 Credit Hours

English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 2757

Students should have a basic knowledge of Internet technologies before enrolling in this course. This course focuses on design and implementation techniques for Web-based application software. Server-side software design and development techniques associated with Web Developer job skills will be emphasized. Topics to be covered will include: Web application architecture; C# language basics; ASP.NET technologies for server-side Web development; database access; asynchronous JavaScript and JSON or XML-based request processing; and Web application security. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2616  Database Application Design and Development with Oracle PL/SQL

Equivalent: Placement into ENG 1510.
Prerequisite: CIS 1200 or consent of instructor.

This course will focus on design and development of database applications using Oracle PL/SQL, Oracle development tools, and use of Oracle XML data types for implementation of PL/SQL programs, procedures, functions, packages, and triggers. Oracle-specific materials used in this course are designed to prepare students for the Oracle Program with PL/SQL exam which is the second exam required to become an Oracle Certified Associate or Oracle Certified Professional. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2636  Network Administration

Equivalent: Placement into ENG 1510.
Prerequisite: CIS 1300

This course is designed for Information Technology professionals who want to learn advanced topics in network administration. Areas covered include topics like routing protocols, congestion control algorithms, Quality of Service. The student will also be exposed to network security, trouble shooting networks, remote access technologies like VPN and some router switch configuration. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 2637  Big Data and NoSQL Systems

Equivalent: Placement into ENG 1510.
Prerequisite: CIS 1200

This course is focused on the architecture, design, implementation and support of Big Data systems and non-traditional information retrieval techniques (i.e. techniques that do not use structured query languages). Topics covered include: characteristics and analysis of big data; big data life cycle; big data platforms and highly distributed file systems; big data processing and storage technologies; and NoSQL. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 3

CIS 2656  Visual Basic.NET Programming

Equivalent: CIS 1250,DPR 1250

English/ESL Placement: Placement into ENG 1510.

This course focuses on software design and development techniques with the Visual Basic.NET programming language. Topics to be covered will include: Overview of the Microsoft .NET architecture; user interface forms and controls; variables, arrays, procedures, and control structures; object-oriented programming techniques; exception handling; data access with ADO.NET; and simple integration with Web technologies. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2737  Database Administration

Equivalent: Placement into ENG 1510.
Prerequisite: CIS 1200

The purpose of the Database Administration course is to train students on typical activities performed by a database administrator (DBA) and on issues important to efficient performance of a database. The course will involve significant hands-on and lab work using the Oracle and/or MySQL server DBMS. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4
CIS 2757  C# Programming ............................................ 4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Students should have a basic understanding of general programming
corcepts and techniques prior to enrolling in this class. This course
focuses on the design and implementation of software using the C#
programming language. Students will learn how to develop programs that
utilize classes and objects, arrays, graphical user interfaces, event driven
programming and exception handling. Visual Studio .NET will be used as
the primary integrated development environment. Students will be required
to complete computer-based assignments inside and outside of class.
BILLABLE CONTACT HOURS: 4

CIS 2818  Mobile Application Development (Android) ............................................ 4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1500 or consent of instructor.
This course focuses on the design and implementation of wireless
handheld application software on the Android platform for business and
personal use. Students will use the Android Studio integrated development
environment (IDE) to develop and test application software. Development
techniques will focus on operational aspects of mobile devices that
distinguish them from PCs and general computing platforms. Students will
be required to complete computer-based assignments inside and outside of class.
BILLABLE CONTACT HOURS: 4

CIS 2819  Mobile Application Development (iOS) ............................. 4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
In this course, students will learn how to write computer software
using the SWIFT programming language that runs on Apple iOS-
based mobile devices. Topics covered will include: the iOS platform
execution environment; basic Swift language features such as data
types, conditional statements, iteration, data collections, classes,
functions, and error handling; user interface design and event-based
processing; persistent data management; and integration with local and
remote services. Students will be required to complete computer-based assignments inside and outside of class.
BILLABLE CONTACT HOURS: 4

CIS 2838  System Security ....................................................... 4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1600
This course is designed for aspiring security professionals, system or
network administrators, or other information technology professionals
who want to learn about computer security. Being a part of two courses,
this part focuses on the security engineer who needs to worry about the
attacks used by hackers and the defenses against them. The course
makes an effort to understand defenses against Reconnaissance,
Scanning, Gaining Access, Maintaining access and covering tracks. Last
but not the least, the course covers computer ethics. The Students will be
required to complete computer-based assignments inside/outside of class.
BILLABLE CONTACT HOURS: 4

CIS 2845  Computer Forensics ..................................................... 4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1600
With ever growing reliance on computers for everyday life projects,
and increased focus on security and breach of security and privacy,
there is a need for a course which can help security professionals and
law enforcement agencies learn ways to investigate security breaches.
This course is designed to introduce a variety of operating systems
investigation techniques, incident response tactics, and legal issues. The
course helps learn forensic techniques and tools for both Windows and
Linux investigations. Students will be required to complete computer-
based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2858  Web System Integration and Service Development ............................................ 4 Credit Hours
Equivalent: CIS 2414
English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1500 or CIS 2151 or CIS 2454
This course focuses on design and implementation strategies for
integration of distributed client-server software and development of Web
application services. Topics to be covered will include: Web middleware-
related technologies such as the Java Enterprise Edition platform (Java EE),
multi-tier application frameworks; Extensible Markup Language (XML)
processing; Simple Object Access Protocol (SOAP); Representational
State Transfer (RESTful) Web services; Web Services Description
Language (WSDL); and Cloud Computing services. Students will use a
popular IDE tool to create and integrate Web application components.
Completion of computer-based assignments inside and outside of class
will be required. BILLABLE CONTACT HOURS: 4

CIS 2859  Foundations of Game Software Development ............................................ 4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Students should have a basic understanding of object-oriented
programming prior to enrolling in this class. This course focuses on the
fundamentals and techniques of game software development. Students will
use a popular game engine and associated software tools to learn
how various elements of games are created, integrated into a system,
and used in game play. Game system elements include: game engine
functions; scripts; graphical interface; models; terrains and worlds;
textures; sound; and support infrastructure. Students will also apply
mathematical foundations used in computer graphics. Students will be required to complete computer-based assignments inside and outside of class.
BILLABLE CONTACT HOURS: 4

CIS 2862  Game Design ......................................................... 3 Credit Hours
English/ESL Placement: Placement into ENG 1510.
This course is focused on the essential principles of designing game
software. The philosophy of video games as a form of entertainment as
well as important design concepts that feature player-centric approaches
will be explored. Other topics to be covered include: the genres of
games; design components and processes; game analysis frameworks;
storyboarding; creative and expressive play; character development;
storytelling and narrative; game play mechanics; defining appropriate
physical models and game worlds; and level design. Students will be
required to complete computer-based assignments inside and outside of class.
BILLABLE CONTACT HOURS: 3

CIS 2901  CIS Internship/Co-Op I ........................................... 4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: 19 CIS credit hours.
Prerequisite: Consent of instructor.
The student will be employed in an industry position that relates to specific
career goals. Appropriate meeting and student reporting times will be
arranged at the college for faculty/coordinator guidance. Students will work
a minimum of 12 hours per week at a worksite. Entrance into this course
will be on a limited basis depending upon industry positions available.
Opportunities may include worksite assignments that foster relationships
with sponsoring organizations and create possible carryover internship/
co-op tracks with other educational institutions. The CIS department
must approve the worksite assignment prior to enrollment. BILLABLE CONTACT HOURS: 4
CIS 2980  Computer Service Technologies & Techniques A+  
4 Credit Hours  
Equivalent: ECT 2150  
English/ESL Placement: Placement into ENG 1510.  
Prerequisite: CIS 2232 or consent of instructor.  
This course provides the necessary preparation to take the industry standard Core Hardware Certification exams. Topics studies include, but are not limited to: core hardware requirements, installation, configuration and upgrading, diagnosing and troubleshooting, preventive maintenance, motherboard/processors/memory, basic networking and security. Students will be required to complete computer-based assignments outside of class. Note: certification exams are administered and charged separately by an outside agency. BILLABLE CONTACT HOURS: 4

CIS 2991  Special Project in Software Engineering .... 3 Credit Hours  
English/ESL Placement: Placement into ENG 1510.  
Prerequisite: Successful completion of all required core courses in the CIS.SWE.CT CIS Software Engineering Certificate program: CIS 1200 CIS 1500 CIS 1512 and CIS 2353.  
Prerequisite: Complete a minimum of 6 credits in one focus area of the CIS.SWE.CT CIS Software Engineering Certificate program.  
This course is focused on development of material for a personal 'software' portfolio that may be used to support employment opportunity applications. Common tools and techniques used in work environments as well as typical workplace processes will be explored with the purpose of preparing students for employment as software developers. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 3
