Computer Information Systems

Computer Information Systems
Business, Management, Marketing and Technology
Auburn Hills and Orchard Ridge Campuses

Associate Degrees

The Computer Information Systems (CIS) associate degrees are designed for students who need general education (e.g., communication, science, mathematics, fine arts, social science) combined with a solid foundation in the fundamental computer skills that are generally required to design, create, and test software, or analyze business system requirements and design solutions, or support and protect the operation of technology resources. These fundamental computer skills are commonly required by most four-year educational programs that offer the types of bachelor degrees most employers look for when hiring information technology professionals. All CIS courses use current computer tools and place an emphasis on practical application to provide a relevant learning environment.

Four CIS associate degree choices are available:

- Business Systems Analysis Option (CIS.BSA.AAS)
- Cybersecurity Option (CIS.CYS.AAS)
- Information Technology Support Option (CIS.ITS.AAS)
- Software Engineering Option (CIS.SWE.AAS)

Certificates

The Computer Information Systems (CIS) certificates are designed for students who need specialty skills in a particular area of information technology that will help satisfy current of future employment requirements. Unlike associate degrees, certificate programs assume that students already have obtained or do not require general education skills and are now looking for education in a specific area of computer technology. Therefore, all of the courses within a certificate program are chosen to develop these specific technical skills in a shorter amount of time than what would be required in an associate degree program.

Five CIS certificate choices are available. Two of the five choices (Software Engineering and Information Technology Support) are fairly broad areas that require multiple types of focus areas within them. The courses within each focus area have been chosen to match with popular employer requirements for that particular skill type.

- Cybersecurity Certificate (CIS.CYS.CT)
- Information Technology Support Certificate (CIS.ITS.CT)¹
  - Computer and Systems Support (focus area)
  - Database Technology and Administration (focus area)
  - Network Technology and Administration (focus area)
- Software Engineering Certificate (CIS.SWE.CT)¹
  - Game Design and Development (focus area)
  - General Software Development (focus area)
  - Mobile Application Development (focus area)
  - Web Application Development (focus area)
- Web Designer Certificate (CIS.WDE.CT)
- Cisco Internetworking Certificate of Achievement (CIS.CIN.CA)

¹ A separate certificate is not awarded for each focus area. For the CIS.ITS.CT program, students choose 1 of 3 focus areas. For the CIS.SWE.CT program, students choose 1 of 4 focus areas.

Other Training Options

Professional certification preparation courses are offered through the OCC CIS department as well as the Economic and Workforce Development office. Industry exam preparation courses cover material from certifying organizations such as Microsoft, Cisco, Sun, Oracle, Novell, and CompTIA. Several exam preparation courses (e.g., CIS-1305, CIS-1310, CIS-1320, CIS-1330, CIS-1600, CIS-2434, CIS-2515, CIS-2535, CIS-2616, CIS-2980) offered for credit through the CIS department are listed in the OCC course catalog. Custom-designed non-credit courses for local businesses are also available through Workforce Development. CIS course details may be obtained by contacting the CIS department at the Orchard Ridge or Auburn Hills campus. Custom course details and related information may be obtained by contacting the Economic and Workforce Development office at (248) 232-4000 in the M-TEC building on the Auburn Hills Campus.

The M-TEC building also serves as a Pearson VUE Authorized Test Center where students can take official certification exams. Information about testing and related Economic and Workforce Development services is available within the OCC website at www.oaklandcc.edu.

Degrees

- Computer Information Systems - Cybersecurity Option (CIS.CYS.AAS) (http://catalog.oaklandcc.edu/programs/computer-information-systems/cybersecurity-option-aas)
- Computer Information Systems - Information Technology Support Option (CIS.ITS.AAS) (http://catalog.oaklandcc.edu/programs/computer-information-systems/tech-support-option-aas)
- Computer Information Systems - Software Engineering Option (CIS.SWE.AAS) (http://catalog.oaklandcc.edu/programs/computer-information-systems/software-engineering-option-aas)

Certificates

- Computer Information Systems - Cybersecurity Certificate (CIS.CYS.CT) (http://catalog.oaklandcc.edu/programs/computer-information-systems/cybersecurity-option-ct)
- Computer Information Systems - Information Technology Support Certificate (CIS.ITS.CT) (http://catalog.oaklandcc.edu/programs/computer-information-systems/tech-support-option-ct)
  - Computer and Systems Support Focus Area or
  - Database Technology and Administration Focus Area or
  - Network Technology and Administration Focus Area
  - Game Design and Development Focus Area or
  - General Software Development Focus Area or
  - Mobile Application Development Focus Area or
  - Web Application Development Focus Area
Computer Information Systems Courses

CIS 1000  Computer Literacy  1 Credit Hour

CIS 1050  Personal Computer Productivity Tools  4 Credit Hours

CIS 1060  Personal Computer Spreadsheet Concepts  3 Credit Hours

CIS 1070  Personal Computer Presentation Concepts  3 Credit Hours

CIS 1080  Personal Computer Database Concepts  3 Credit Hours

CIS 1090  Web Graphic Concepts  3 Credit Hours

CIS 1100  Fundamentals of Information Systems  4 Credit Hours
CIS 1200  Introduction to Database Systems  ...... 4 Credit Hours  
Equivalent: DPR 1200  
English/ESL Placement: Placement into ENG 1510.  
This course will focus on the fundamentals of database systems. Students will study the basics of database vs. file management systems; functions, components, and personnel involved in a database; database, client-server, and transaction processing architectures; and relational data models and operations. Students will also study business requirements analysis, perform data definition, manipulation, and queries using basic SQL, create forms and reports; and analyze macros and triggers. Concepts of database planning, design, and administration fundamentals, data warehousing, and data mining will be covered. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 1295  Voice and Data Cabling  .................. 4 Credit Hours  
English/ESL Placement: Placement into ENG 1510.  
Students will become familiar with cabling issues related to data and voice connections, media (copper and fiber) and transmissions practices, and cabling customer support. This course stresses documentation, design and installation issues, laboratory safety and on-the-job safety, as well as working effectively in group environments. BILLABLE CONTACT HOURS: 4

CIS 1300  Networking Concepts  ...................... 4 Credit Hours  
Equivalent: CIS 2710  
English/ESL Placement: Placement into ENG 1510.  
Students will explore the components of networks and network designs. Communications hardware and the interconnection of servers and clients within LANs and WANs will be presented. Network architectures, standards, protocols and access methods used within intranets and the Internet will be described. The functions of network operating systems such as Windows Server, Unix, and Novell NetWare will be explored. Centralized computing, client/server and peer-to-peer environments, their services and their program-to-program communication protocols will be presented. Data security and system component protection will be studied. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 1305  CCNA Studies I: Introduction to Networks  ...... 4 Credit Hours  
English/ESL Placement: Placement into ENG 1510.  
This course is the first of four courses training students on the topics tested in CCNA (Cisco Certified Network Associate) certificate. Introduces the architecture, structure, functions, components, and models of the Internet and computer networks. The principles of IP addressing and fundamentals of Ethernet concepts, media, and operations are introduced to provide a foundation for the curriculum. By the end of the course, students will be able to build simple LANs, perform basic configurations for routers and switches, and implement IP addressing schemes. BILLABLE CONTACT HOURS: 4

CIS 1310  CCNA Studies II: Routing and Switching Essentials  .............................................. 4 Credit Hours  
English/ESL Placement: Placement into ENG 1510.  
Prerequisite: CIS 1305 or consent of instructor.  
This course is the second of four courses training students on the topics tested in CCNA (Cisco Certified Network Associate) certificate. Describes the architecture, components, and operations of routers and switches in a small network. Students learn how to configure a router and a switch for basic functionality. By the end of this course, students will be able to configure and troubleshoot routers and switches and resolve common issues with RIPv1, RIPv2, single-area and multi-area OSPF, virtual LANs, and inter-VLAN routing in both IPv4 and IPv6 networks. BILLABLE CONTACT HOURS: 4

CIS 1320  CCNA Studies III: Scaling Networks  ...... 4 Credit Hours  
English/ESL Placement: Placement into ENG 1510.  
Prerequisite: CIS 1310  
This course is the third of four courses training students on the topics tested in CCNA (Cisco Certified Network Associate) certificate. Describes the architecture, components, and operations of routers and switches in a large and complex network. Students learn how to configure routers and switches for advanced functionality. By the end of this course, students will be able to configure and troubleshoot routers and switches and resolve common issues with OSPF, EIGRP, STP, and VTP in both IPv4 and IPv6 networks. Students will also develop the knowledge and skills needed to implement DHCP and DNS operations in a network. BILLABLE CONTACT HOURS: 4

CIS 1330  CCNA Studies IV: Connecting Networks  ...... 4 Credit Hours  
English/ESL Placement: Placement into ENG 1510.  
Prerequisite: CIS 1320  
This course is the fourth of four courses training students on the topics tested in CCNA (Cisco Certified Network Associate) certificate. Discusses the WAN technologies and network services required by converged applications in a complex network. The course enables students to understand the selection criteria of network devices and WAN technologies to meet network requirements. Students learn how to configure and troubleshoot network devices and resolve common issues with data link protocols. Students also develop the knowledge and skills needed to implement IPSec and virtual private network (VPN) operations in a complex network. BILLABLE CONTACT HOURS: 4

CIS 1400  Web Design I  .................................. 4 Credit Hours  
Equivalent: CIS 1510,CIS 1110  
English/ESL Placement: Placement into ENG 1510.  
This course focuses on the fundamentals of web site content development. Students will be introduced to the fundamental HTML5 structure of a webpage and then proceed to creating pages using a professional web editing tool. Students will create a fully functional original website using the web design editing tool that has elements such as images, hyperlinks, cascading style sheets for formatting, tables and integration of certain multimedia elements such as sound files, videos and Flash objects. Discussions will include accessibility of the design, overall site maintenance and publishing using FTP technologies. Students taking this course should have working knowledge of Windows and basic knowledge of the Internet. BILLABLE CONTACT HOURS: 4
CIS 1420  HTML5 Programming  3 Credit Hours
Equivalent: CIS 2781
English/ESL Placement: Placement into ENG 1510.
This course focuses on designing and coding internet web pages using HTML5. The student will develop web pages by designing, entering, and testing code using this standard (with a simple text editor) rather than by using web development tools. Topics include - HTML5 element structure, web forms, multimedia, style sheets (CSS3) to apply formatting and layout characteristics in addition to applying special effects. This course will also include an introduction to the JavaScript programming language. Students should be familiar with the basics of both word processing and Windows file management techniques before enrolling in this course. BILLABLE CONTACT HOURS: 3

CIS 1440  JavaScript Programming for Websites  4 Credit Hours
Equivalent: CIS 1125
English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1420
This course introduces the student to the fundamentals of JavaScript as a client-side scripting language for the purpose of developing dynamic Web-based applications that run within a Web browser. Emphasis is placed on programming techniques and Web technology. Topics include functions, data types, operators, strings, arrays, control structures, form validation, event handling, the Document Object Model, and debugging. Students should be familiar with fundamental computer usage, word processing, and HTML5 prior to enrolling in this class. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 1500  Introduction to Programming (Java)  4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Students should have elementary Algebra skills and be familiar with both elementary word processing and Windows file management techniques prior to enrolling in this class. Students will be introduced to the fundamental techniques and syntax for understanding, designing, constructing, debugging, and testing object-oriented programs by studying the Java programming language. The structured programming basics of process, selection and iteration will be covered as well as primitive and complex data typing, methods, parameters and input/output. The basics of graphical user interface (GUI) programming such as event handling, windows and widgets will be introduced. Fundamental object-oriented concepts of classes, methods, abstraction, encapsulation and inheritance will also be introduced. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 1512  Principles of Software Engineering  3 Credit Hours
English/ESL Placement: Placement into ENG 1510.
This course is focused on formal methods and approaches used in the design, development, testing and maintenance of computer software. Each stage of the software development life cycle (SDLC) will be studied in detail. Topics such as low-level design, high-level design, modeling with UML (Unified Modeling Language), iterative development models, rapid application development (RAD), formal testing methods, incremental deployment, formal metrics, as well as appropriate use of associated tools will be covered with practical applications. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 3

CIS 1550  Introduction to Secure Programming  3 Credit Hours
English/ESL Placement: Placement into ENG 1510.
This course presents cybersecurity content related to analyzing software risks, understanding likely points of application attack, and making preliminary decisions about how software applications mitigate attack. The student will learn how to identify systemic threats in any deployment environment, understand the vulnerabilities of common software applications, and how to construct software that are responsive to identified vulnerabilities. BILLABLE CONTACT HOURS: 3

CIS 1600  Fundamentals of Cybersecurity  4 Credit Hours
Equivalent: CIS 2839,CIS 2839
English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1300
This course is designed for aspiring security professionals, system or network administrators, or other information technology professionals who want to learn about computer security. Students will be well prepared for the Security+ Exam after taking this class. This course focuses on General security concepts, Communication security, Infrastructure security, Basics of Cryptography, and Operational Organizational security. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 1610  Data Security  4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1600
This course is focused on the structure of data and database systems, their vulnerabilities to cyber attacks, and the proper techniques required to protect these systems from damage. Material covered will include: analysis of database-related malware; data system architecture; database system installation and configuration; data access controls and authentication; data security tools and devices; and security testing and auditing. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 1620  Introduction to Cryptography  4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1600
This course is focused on basic techniques of encryption and decryption and their application to computer security. Topics covered will include: basic number theory and finite field arithmetic used in cryptography; symmetric ciphers; asymmetric ciphers; block and stream ciphers; implementation of popular encryption algorithms (e.g., AES); hash algorithms; digital signatures; and key management and distribution. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 1630  Security Policy, Legal, Ethics and Compliance  3 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1600
This course provides a comprehensive introduction to the identification, selection, assessment, and continuous monitoring of management controls that provide a cyber security governance structure throughout an organization and its supply chain. The course will emphasize security policies and frameworks, their organizational implications, to the psychology, ethics, and legal considerations of their implementation. BILLABLE CONTACT HOURS: 3
CIS 1720 Multimedia Data Management .......... 4 Credit Hours
Equivalent: CIS 1001
English/ESL Placement: Placement into ENG 1510.
This course will give students a broad foundation in issues surrounding multimedia, including the role of and design of multimedia systems which incorporate digital audio, graphics and video, underlying concepts and representations of sound, pictures and video, data compression, transmission and storage, integration of media, multimedia authoring, and delivery of multimedia. Course will also include industry overview, societal issues, cultural implications, visual literacy and career opportunity. The students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 1721 Web Design II .................................... 3 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1400 or consent of instructor.
This course will provide students with intermediate to advanced skills in web publishing focusing on abilities to design web pages with variations in web browsers in mind. Students will continue to work with a web design editing tool and create pages that include forms, validation, and cascading style sheet based design layout. Students will create a website that is ADA (American Disabilities Act) compliant. Students should be familiar with elementary word processing and MS Windows file management techniques prior to enrolling in this class. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 3

CIS 1722 Web Animation ..................................... 3 Credit Hours
English/ESL Placement: Placement into ENG 1510.
This course will provide introductory level knowledge of effectively working with vector based design applications aimed at the creation of animation, games, and interactive components for use on the internet. Students will focus on the creation of basic animation and navigation components for use on web sites as well as for projects aimed at offline use. Students taking this course should have basic Windows background and general knowledge of internet technologies. BILLABLE CONTACT HOURS: 3

CIS 1801 Special Topics I: Network Remediation ....... 3 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: The prerequisite for a special topics section will depend on the content of that section. Refer to the specific section using OCC's online system for a description of the current course and its associated prerequisites.
Network Remediation. BILLABLE CONTACT HOURS: 3

CIS 1802 Special Topics I: Introduction to Cybersecurity and Risk Management .................................... 3 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: The prerequisite for a special topics section will depend on the content of that section. Refer to the specific section using OCC's online system for a description of the current course and its associated prerequisites.
Introduction to Cybersecurity and Risk Management. BILLABLE CONTACT HOURS: 3

CIS 1803 Special Topics I .................................... 1-4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: The prerequisite for a special topics section will depend on the content of that section. Refer to the specific section using OCC's online system for a description of the current course and its associated prerequisites.
Students will be introduced to a particular contemporary topic or issue in information science that is relevant in today's environment. Refer to the specific section using OCC's online system for current topics. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 1 - 4

CIS 1804 Special Topics I: Macro Media Director ...... 4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: The prerequisite for a special topics section will depend on the content of that section. Refer to the specific section using OCC's online system for a description of the current course and its associated prerequisites.
Macro Media Director. BILLABLE CONTACT HOURS: 4

CIS 1805 Special Topics I: Introduction to Adobe Creative Suite CS2 ................................................. 4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: The prerequisite for a special topics section will depend on the content of that section. Refer to the specific section using OCC's online system for a description of the current course and its associated prerequisites.
Introduction to Adobe Creative Suite CS2. BILLABLE CONTACT HOURS: 4

CIS 1811 Special Topics II .................................... 1-4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: The prerequisite for a special topics section will depend on the content of that section. Refer to the specific section using OCC's online system for a description of the current course and its associated prerequisites.
Students will be introduced to a particular contemporary topic or issue in information science that is relevant in today's environment. Refer to the specific section using OCC's online system for current topics. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 1 - 4

CIS 1812 Special Topics II .................................... 1-4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: The prerequisite for a special topics section will depend on the content of that section. Refer to the specific section using OCC's online system for a description of the current course and its associated prerequisites.
Students will be introduced to a particular contemporary topic or issue in information science that is relevant in today's environment. Refer to the specific section using OCC's online system for current topics. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 1 - 4

CIS 1813 Special Topics II .................................... 1-4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: The prerequisite for a special topics section will depend on the content of that section. Refer to the specific section using OCC's online system for a description of the current course and its associated prerequisites.
Students will be introduced to a particular contemporary topic or issue in information science that is relevant in today's environment. Refer to the specific section using OCC's online system for current topics. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 1 - 4
### CIS 1814 Special Topics II .......................... 1-4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: The prerequisite for a special topics section will depend on the content of that section. Refer to the specific section using OCC's online system for a description of the current course and its associated prerequisites.

Students will be introduced to a particular contemporary topic or issue in information science that is relevant in today's environment. Refer to the specific section using OCC's online system for a description of the current course and its associated prerequisites.

Introduction to C Sharp Programming Language. BILLABLE CONTACT HOURS: 1 - 4

### CIS 2111 Systems Analysis and Design (UML) .... 4 Credit Hours
Equivalent: CIS 2030, DPR 2030
English/ESL Placement: Placement into ENG 1510.

Students should be familiar with the basics of both word processing and Windows file management techniques before enrolling in this course.

Students will survey and practice the techniques used by system analysts and programmers in the analysis and design of computer-based business information systems with focus on the Unified Modeling Language (UML). Both traditional and object-oriented methods will be presented. System and object-oriented development life cycles (SDLC and ODLC) and subjects in computer-aided software engineering (CASE) such as project management, requirements modeling, data flow and entity relationship diagrams (DFD and ERD) and data dictionaries are among the included topics. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

### CIS 2115 Business Analysis and Processes ..... 4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1050 CIS 1060 CIS 1200 and CIS 2111.

In this course emphasis will be placed on tools and techniques to help with the analysis and process of solving business problems with technology. This course will cover process analysis, process flow diagrams, data analysis, predictive analysis and modeling, data modeling, Entity Relationship Diagrams (ERD), data dictionary, data mapping and the software tools available. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

### CIS 2120 Problem Solving and Information Technology ..... 4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1050 and CIS 1060.

This course demonstrates how information technology impacts organizations, with an emphasis on using information technology to solve problems and introduces the need for business processes and IT alignment. Topics include main concepts of information technology at a general level, on-line collaboration tools, application software, and information literacy as applied to searching and using the Internet. In addition, students will use application software at an intermediate level and apply it to problem solving scenarios. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

### CIS 2151 Object-Oriented Programming (Java) .... 4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1500

Students will be exposed to more complicated programming problems and will study the techniques and structures used to solve these problems with the Java language. Topics will include exception handling, file input and output, composition, inheritance, polymorphism, abstract classes and interfaces. Advanced Graphic User Interface (GUI) design and implementation techniques will be covered. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

### CIS 2212 Project Management .......................... 4 Credit Hours
English/ESL Placement: Placement into ENG 1510.

Students should be familiar with the basics of both word processing and Windows file management techniques before enrolling in this course. This course focuses on management strategies and analysis of business information systems projects. Project management issues and techniques specific to projects will be emphasized. Emphasis is on creating plans and implementing projects that are within budget, on time, and deliver useful results. Technology and project management standards, design tools (e.g., UML), product evaluation criteria, infrastructure integration, and communication of technical implementation details will be covered in group discussion and project work. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

### CIS 2232 Fundamentals of System Support ......... 4 Credit Hours
Equivalent: DPR 2050
English/ESL Placement: Placement into ENG 1510.

Students will be introduced to the basic software and hardware concepts and facilities needed for simple support tasks. Topics covered include system boot sequences, disk partitioning, disk fragmentation, system configuration files, types of memory and memory management, basic OS commands and batch file construction. Emphasis is given to the Windows OS relationships and facilities. Hardware factors related to system and software evaluation, selection, purchase and installation are presented. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

### CIS 2252 Object-Oriented Programming (C++) .... 4 Credit Hours
English/ESL Placement: Placement into ENG 1510.

Students should have a basic understanding of general programming concepts and techniques prior to enrolling in this class. Students will be instructed in the syntax and semantics of the ANSI C++ language. Topics covered include control structures, arrays, pointers, strings, dynamic memory management, class definition and object-based development, file I/O, overloading, exception handling, and template libraries. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

### CIS 2313 E-Business and E-Commerce ............. 4 Credit Hours
English/ESL Placement: Placement into ENG 1510.

Students should have a basic knowledge of Internet technologies before enrolling in this course. Introduction is provided to a broad range of theories, practices, standards, and procedures related to the strategic implementation of e-commerce systems aimed at supporting one or more organizational business initiatives. A series of topics will be presented and cases analyzed that teach the student material ranging from: e-commerce business models, e-commerce technologies, supporting standards, to e-commerce analysis and design methodologies. The students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4
CIS 2333  Web System Administration  4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1300
This course focuses on the operation and administration of Web application servers such as Apache HTTP, IIS, Tomcat and WebSphere. Students will study the basic structure and function of Web servers as well as the common tasks and services performed by administrators. Topics include Web protocols and related networking; Web server installation and configuration; integration with other essential services such as email, database management, file transfer, domain name services, and authentication; security; monitoring and performance; and virtualization. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2355  Database Design and Management with Oracle SQL  4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1200 or consent of instructor.
This course will focus on design and management of database environments using Oracle SQL and associated Oracle technologies. Topics include enterprise information resource planning and object-oriented and entity-relationship data modeling methodologies, normalization and the relational model, logical and physical database design, and implementation, population and processing of a relational database for data access, report generation, database definition, data manipulation, and access control. Oracle-specific materials used in this course are designed to prepare students for an Oracle Database SQL exam which is the first exam required to become an Oracle Certified Associate or Oracle Certified Professional. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2332  Data Structures  4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1590
Students will investigate the programming techniques and theories involved in implementing linked lists, queues, stacks and tree structures. Recursion, searching techniques and sorting algorithms will also be considered. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2557  Web System Development (ASP.NET, C#)  4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 2757
Students should have a basic knowledge of Internet technologies before enrolling in this course. This course focuses on design and implementation techniques for Web-based application software. Server-side software design and development techniques associated with Web Developer job skills will be emphasized. Topics to be covered will include: Web application architecture; design patterns and application frameworks; PHP language basics; Java technologies for server-side Web development; database access; Extensible Markup Language (XML) and Asynchronous JavaScript and XML (AJAX)-based request processing; and Web application security. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2353  Microsoft Windows Server Administration  3 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 2332
Students should be familiar with elementary word processing and Microsoft Windows file management techniques and basic hardware, software, and network operating system, architecture, and protocol concepts needed for simple support tasks prior to enrolling in this course. Concepts of electronic business communications and local area networks will be covered. The Microsoft Windows Server operating system will be used and studied in this course. Installation of network operating system, setup of users and groups, files and folder trustee rights, and console management will be covered. Students will be required to complete computer-based assignments inside/outside of class. This course covers material in and prepares students for the first part of Microsoft's MCSA and MCSE certification tracks. BILLABLE CONTACT HOURS: 3

CIS 2434  Introduction to Linux and Unix Administration  3 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 2332
Students should be familiar with elementary word processing and Unix concepts prior to enrolling in this course. This hands-on class covers the concepts related to Linux/Unix installation and system administration. Students will install and administer a Linux/Unix operating system using a virtual machine software product. It is intended for students who plan to work as Linux/Unix system administrators or for those who plan to take one or more certification tests as part of their professional preparation. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 3

CIS 2454  Web System Development (PHP, Java)  4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1930
This course focuses on design and implementation techniques for Web-based application software. Server-side software design and development techniques associated with Web Developer job skills will be emphasized. Topics to be covered will include: Web application architecture; design patterns and application frameworks; PHP language basics; Java technologies for server-side Web development; database access; Extensible Markup Language (XML) and Asynchronous JavaScript and XML (AJAX)-based request processing; and Web application security. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4
CIS 2616 Database Application Design and Development with Oracle PL/SQL ................................................................. 4 Credit Hours

English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1200 or consent of instructor.
This course will focus on design and development of database applications using Oracle PL/SQL, Oracle development tools, and use of Oracle XML data types for implementation of PL/SQL programs, procedures, functions, packages, and triggers. Oracle-specific materials used in this course are designed to prepare students for the Oracle Program with PL/SQL exam which is the second exam required to become an Oracle Certified Associate or Oracle Certified Professional. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2636 Network Administration ................................. 4 Credit Hours

English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1300
This course is designed for Information Technology professionals who want to learn advanced topics in network administration. Areas covered include topics like routing protocols, congestion control algorithms, Quality of Service. The student will also be exposed to network security, trouble shooting networks, remote access technologies like VPN and some router switch configuration. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 2637 Big Data and NoSQL Systems .......................... 3 Credit Hours

English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1200
This course is focused on the architecture, design, implementation and support of Big Data systems and non-traditional information retrieval techniques (i.e. techniques that do not use structured query languages). Topics covered include: characteristics and analysis of big data; big data life cycle; big data platforms and highly distributed file systems; big data processing and storage technologies; and NoSQL. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 3

CIS 2656 Visual Basic.NET Programming .......................... 4 Credit Hours
Equivalent: CIS 1250,DPR 1250

English/ESL Placement: Placement into ENG 1510.
This course focuses on software design and development techniques with the Visual Basic .NET programming language. Topics to be covered will include: Overview of the Microsoft .NET architecture; user interface forms and controls; variables, arrays, procedures, and control structures; object-oriented programming techniques; exception handling; data access with ADO.NET; and simple integration with Web technologies. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2737 Database Administration ................................. 4 Credit Hours

English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1200
The purpose of the Database Administration course is to train students on typical activities performed by a database administrator (DBA) and on issues important to efficient performance of a database. The course will involve significant hands-on and lab work using the Oracle and/or MySQL server DBMS. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 2757 C# Programming ............................................. 4 Credit Hours

English/ESL Placement: Placement into ENG 1510.
Students should have a basic understanding of general programming concepts and techniques prior to enrolling in this class. This course focuses on the design and implementation of software using the C# programming language. Students will learn how to develop programs that utilize classes and objects, arrays, graphical user interfaces, event-driven programming and exception handling. Visual Studio .NET will be used as the primary integrated development environment. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2818 Mobile Application Development (Android) ...... 4 Credit Hours

English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1500 or consent of instructor.
This course focuses on the design and implementation of wireless handheld application software on the Android platform for business and personal use. Students will use the Android Studio integrated development environment (IDE) to develop and test application software. Development techniques will focus on operational aspects of mobile devices that distinguish them from PCs and general computing platforms. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2819 Mobile Application Development (iOS) ........... 4 Credit Hours

English/ESL Placement: Placement into ENG 1510.
In this course, students will learn how to write computer software using the SWIFT programming language that runs on Apple iOS-based mobile devices. Topics covered will include: the iOS platform execution environment; basic SWIFT language features such as data types, conditional statements, iteration, data collections, classes, functions, and error handling; user interface design and event-based processing; persistent data management; and integration with local and remote services. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2838 System Security ............................................ 4 Credit Hours

English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1600
This course is designed for aspiring security professionals, system or network administrators, or other information technology professionals who want to learn about computer security. Being a part of two courses, this part focuses on the security engineer who needs to worry about the attacks used by hackers and the defenses against them. The course makes an effort to understand defenses against Reconnaissance, Scanning, Gaining Access, Maintaining access and covering tracks. Last but not the least, the course covers computer ethics. The Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4
CIS 2845  Computer Forensics  ..........................  4 Credit Hours

English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1600

With ever growing reliance on computers for every day life projects, and increased focus on security and breach of security and privacy, there is a need for a course which can help security professionals and law enforcement agencies learn ways to investigate security breaches. This course is designed to introduce a variety of operating systems investigation techniques, incident response tactics, and legal issues. The course helps learn forensic techniques and tools for both Windows and Linux investigations. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2858  Web System Integration and Service Development  ..........................  4 Credit Hours

Equivalent: CIS 2414

English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1500 or CIS 2151 or CIS 2454

This course focuses on design and implementation strategies for integration of distributed client-server software and development of Web application services. Topics to be covered will include: Web middleware-related technologies such as the Java Enterprise Edition platform (Java EE), multi-tier application frameworks; Extensible Markup Language (XML) processing; Simple Object Access Protocol (SOAP); Representational State Transfer (RESTful) Web services; Web Services Description Language (WSDL); and Cloud Computing services. Students will use a popular IDE tool to create and integrate Web application components. Completion of computer-based assignments inside and outside of class will be required. BILLABLE CONTACT HOURS: 4

CIS 2859  Foundations of Game Software Development  ..........................  4 Credit Hours

English/ESL Placement: Placement into ENG 1510.

Students should have a basic understanding of object-oriented programming prior to enrolling in this class. This course focuses on the fundamentals and techniques of game software development. Students will use a popular game engine and associated software tools to learn how various elements of games are created, integrated into a system, and used in game play. Game system elements include: game engine functions; scripts; graphical interface; models; terrains and worlds; textures; sound; and support infrastructure. Students will also apply mathematical foundations used in computer graphics. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2862  Game Design  ..........................  3 Credit Hours

English/ESL Placement: Placement into ENG 1510.

This course is focused on the essential principles of designing game software. The philosophy of video games as a form of entertainment as well as important design concepts that feature player-centric approaches will be explored. Other topics to be covered include: the genres of games; design components and processes; game analysis frameworks; storyboarding; creative and expressive play; character development; storytelling and narrative; game play mechanics; defining appropriate physical models and game worlds; and level design. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 3

CIS 2901  CIS Internship/Co-Op I  ..........................  4 Credit Hours

English/ESL Placement: Placement into ENG 1510.
Prerequisite: 19 CIS credit hours.
Prerequisite: Consent of instructor.

The student will be employed in an industry position that relates to specific career goals. Appropriate meeting and student reporting times will be arranged at the college for faculty/coordinator guidance. Students will work a minimum of 12 hours per week at a worksite. Entrance into this course will be on a limited basis depending upon industry positions available. Opportunities may include worksite assignments that foster relationships with sponsoring organizations and create possible carryover internship/co-op tracks with other educational institutions. The CIS department must approve the worksite assignment prior to enrollment. BILLABLE CONTACT HOURS: 4

CIS 2980  Computer Service Technologies & Techniques A  +  ..........................................................  4 Credit Hours

Equivalent: ECT 2150

English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 2232 or consent of instructor.

This course provides the necessary preparation to take the industry standard Core Hardware Certification exams. Topics studies include, but are not limited to: core hardware requirements, installation, configuration and upgrading, diagnosing and troubleshooting, preventive maintenance, motherboard/processors/memory, basic networking and security. Students will be required to complete computer-based assignments outside of class. Note: certification exams are administered and charged separately by an outside agency. BILLABLE CONTACT HOURS: 4

CIS 2991  Special Project in Software Engineering  ..........................  3 Credit Hours

English/ESL Placement: Placement into ENG 1510.

Prerequisite: Successful completion of all required core courses in the CIS.SWE.CT CIS Software Engineering Certificate program: CIS 1200 CIS 1500 CIS 1512 and CIS 2353.
Prerequisite: Complete a minimum of 6 credits in one focus area of the CIS.SWE.CT CIS Software Engineering Certificate program.

This course is focused on development of material for a personal ‘software’ portfolio that may be used to support employment opportunity applications. Common tools and techniques used in work environments as well as typical workplace processes will be explored with the purpose of preparing students for employment as software developers. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 3
