Accounting

Degree

- Business Administration with a Concentration in Accounting (ACC.ABA) (http://catalog.oaklandcc.edu/programs/business-administration/business-administration-concentration-accounting-aba/) - Traditional or online program available

Certificate

- General Accounting (ACC.GA.CT) (http://catalog.oaklandcc.edu/programs/accounting/general-certificate/)

Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

Accounting Courses

ACC 1500  Accounting for the Small Business Owner  3 Credit Hours
Equivalent: ACC 1110
English/ESL Placement: Placement into ENG 1060 or higher (or placement into ESL 2510 or higher for students taking the ESL sequence of courses).
This course is designed for the non-accountant business owner. The student will study accounting procedures and applications for small businesses. Topics include bookkeeping for the small business, accounting systems for the small business, understanding of financial statements, overview of inventory management, survey of small business owner tax concerns and accounting concepts relating to financing the small business. BILLABLE CONTACT HOURS: 3

ACC 1800  Accounting Procedures  2 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
This course presents general accounting procedures. Students will study the accounting equation, emphasizing the process of analyzing and recording financial information using the double-entry accounting system. Coverage includes the recording of basic transactions and adjustments for both service and merchandising concerns. BILLABLE CONTACT HOURS: 2

ACC 1803  Payroll Accounting  2 Credit Hours
Equivalent: ACC 2230 | ACC 2230
English/ESL Placement: Placement into ENG 1060 or higher (or placement into ESL 2510 or higher for students taking the ESL sequence of courses).
Prerequisite: ACC 1500 or ACC 1800 with a 'C' or better within the last three years.
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.
This course provides an overview of payroll, record-keeping regulations, reporting requirements, accounting procedures and federal labor laws. The course includes computations of gross wages, salaries, mandatory deductions of federal, state and local taxes, and optional deductions. Also covered is employer related taxes and preparation of various payroll tax forms. BILLABLE CONTACT HOURS: 2

ACC 1805  Accounting with Quickbooks  2 Credit Hours
English/ESL Placement: Placement into ENG 1060 or higher (or placement into ESL 2510 or higher for students taking the ESL sequence of courses).
Prerequisite: ACC 1500 or ACC 1800 with a 'C' or better within the last three years.
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.
This course will expose students to the popular accounting software, Quickbooks. The course reinforces basic accounting procedures through the use of Quickbooks. The student will use Quickbooks to enter accounts receivable and accounts payable transactions and to generate financial reports. BILLABLE CONTACT HOURS: 2

ACC 1810  Principles of Financial Accounting  4 Credit Hours
Equivalent: ACC 2510
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: ACC 1800 with a 'C' or better within the last three years and MAT 1100 or higher with a 'C' or better within the last three years or placement into MAT 1150 or higher within the last three years.
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.
This course reviews basic financial accounting principles covering the accounting cycle. Topics include: cash, receivables and payables, inventory valuation, fixed and intangible assets valuation, current and long term liabilities, and owner's equity. Internal control and financial statement analysis is also considered. Emphasis is placed on the corporate form of ownership. BILLABLE CONTACT HOURS: 4

ACC 1820  Principles of Managerial Accounting  4 Credit Hours
Equivalent: ACC 2520
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: ACC 1810 with a 'C' or better within the last three years.
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.
This course emphasizes the managerial aspects of cost accounting for manufacturing and service entities. Managerial topics will include: cost terms and behavior, determination of the cost of goods manufactured and sold, job order and process cost accounting, cost-volume-profit analysis, variable costing, profit planning and budgeting, standard costs and variance analysis, capital budgeting, and the Statement of Cash Flows. BILLABLE CONTACT HOURS: 4

ACC 2070  Cost Accounting  4 Credit Hours
Equivalent: ACC 2040 | ACC 2020
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: ACC 1820 with a 'C' or better within the last three years.
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.
This intermediate level course reviews and further develops material presented in Managerial Accounting. Additional topics presented include: activity based costing, quality and just-in-time issues, the theory of constraints, pricing decisions and cost management, cost allocation, management control systems and performance measurement. BILLABLE CONTACT HOURS: 4
ACC 2210  Computerized Accounting  ............ 3 Credit Hours  
Equivalent: ACC 2710  
English/ESL Placement: Placement into ENG 1510 or ESL 2520.  
Prerequisite: ACC 1810 with a 'C' or better within the last three years and CIS 1050.  
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.  
The student will be exposed to microcomputer skills as used in accounting and business. The course reinforces financial accounting concepts and procedures through use of personal computers and popular commercial software. The student will use a commercial general ledger software package to cover topics such as: the general ledger, accounts receivable, accounts payable, payroll, adjusting and closing entries. The student will use spreadsheets and/or other appropriate software for report preparation and solution of typical accounting related problems. BILLABLE CONTACT HOURS: 3  

ACC 2501  Special Topics in Accounting .......... 1-4 Credit Hours  
English/ESL Placement: Placement into ENG 1510.  
Prerequisite: The prerequisite for a special topics section will depend on the content of that section. Refer to the specific section using OCC's online system for a description of the current course and its associated prerequisites.  
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.  
Students will be introduced to a particular contemporary topic or in accounting that is relevant in today's business environment. Refer to the specific section using OCC's online system for current topics. BILLABLE CONTACT HOURS: 1 - 4  

ACC 2502  Special Topics in Accounting .......... 1-4 Credit Hours  
English/ESL Placement: Placement into ENG 1510.  
Prerequisite: The prerequisite for a special topics section will depend on the content of that section. Refer to the specific section using OCC's online system for a description of the current course and its associated prerequisites.  
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.  
Students will be introduced to a particular contemporary topic or in accounting that is relevant in today's business environment. Refer to the specific section using OCC's online system for current topics. BILLABLE CONTACT HOURS: 1 - 4  

ACC 2503  Special Topics in Accounting .......... 1-4 Credit Hours  
English/ESL Placement: Placement into ENG 1510.  
Prerequisite: The prerequisite for a special topics section will depend on the content of that section. Refer to the specific section using OCC's online system for a description of the current course and its associated prerequisites.  
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.  
Students will be introduced to a particular contemporary topic or in accounting that is relevant in today's business environment. Refer to the specific section using OCC's online system for current topics. BILLABLE CONTACT HOURS: 1 - 4  

BUS 1100  Introduction to Business ............... 4 Credit Hours  
Equivalent: BUS 1010  
English/ESL Placement: Placement into ENG 1510 or ESL 2520.  
This introductory business class covers the fundamentals of business including free market economics, ethics/social responsibility, entrepreneurship, management, human resource management, marketing, supply chain, finance, information systems, accounting, and government's role in business. All topics are approached in the context of a global business environment. BILLABLE CONTACT HOURS: 4  

BUS 1210  Small Business Basics ................. 3 Credit Hours  
English/ESL Placement: Placement into ENG 1510 or ESL 2520.  
This course examines the factors necessary to start a small business and enhance the likelihood of its success. Topics of study include assessment of the entrepreneurial personality and the suitability of small business as a career, assessing market potential, conducting a feasibility analysis/writing a business plan, raising capital and managing both finances and credit, implementing marketing and management strategies (including risk management, taxes, and record-keeping), and responding to government regulation. BILLABLE CONTACT HOURS: 3  

BUS 1310  Supervision .................................. 3 Credit Hours  
English/ESL Placement: Placement into ENG 1510 or ESL 2520.  
Prerequisite: BUS 1100 or consent of instructor.  
This course examines principles of supervision such as induction, training, disciplining, absenteeism, safety, waste, control, equipment layout, grievance control, production control, and time study. BILLABLE CONTACT HOURS: 3  

BUS 1400  Investment Fundamentals ............... 3 Credit Hours  
English/ESL Placement: Placement into ENG 1510 or ESL 2520.  
This course examines common and preferred stocks, corporate and municipal bonds, mutual funds, cash instruments, and U.S. Treasuries, as they relate to personal investing. Additionally, this course will also examine types of exchanges, ways to analyze corporate financial statements, and economic forecasting. BILLABLE CONTACT HOURS: 3  

BUS 1410  Personal Finance .......................... 3 Credit Hours  
English/ESL Placement: Placement into ENG 1510 or ESL 2520.  
This course examines financial planning principles and proper money management for wealth accumulation. Topics of study include saving and budgeting for the short and long term, managing debt and credit, making major purchases (e.g. auto, home), estate and retirement planning, and investing fundamentals. BILLABLE CONTACT HOURS: 3  

BUS 1450  Internship/Co-op I ....................... 3 Credit Hours  
Equivalent: BUS 1423  
English/ESL Placement: Placement into ENG 1510 or ESL 2520.  
Prerequisite: OCC student with at least 24 credits including 12 credits in business or retailing. Consent of Instructor.  
The internship student will be employed in a position of responsibility as a supervisor or management trainee in a specific business within the student's career field. BILLABLE CONTACT HOURS: 3  

BUS 2030  Business Law I ......................... 3 Credit Hours  
Equivalent: BUS 2010  
English/ESL Placement: Placement into ENG 1510 or ESL 2520.  
This course examines the legal environment of business including the nature of law and dispute resolutions in the United States. Specific topics include court procedure, alternative dispute resolution, constitutional rights, intellectual property, torts, crimes, business ethics, contracts, and sales under the Uniform Commercial Code. BILLABLE CONTACT HOURS: 3
BUS 2040 Business Law II .......................... 3 Credit Hours
Equivalent: BUS 2020
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: BUS 2030
This course examines common law property rights, banking and finance
(negotiable instruments, electronic transfers, secured transactions
and creditors rights), agency and business organizations. BILLABLE
CONTACT HOURS: 3

BUS 2150 International Business ...................... 3 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
The course will introduce the complexities of the international business
environment and provide a knowledge base essential for employment in
today's contemporary businesses. International business fundamentals
addressed in the course include culture, international economics, political
and legal environments, theories of foreign trade, foreign investment,
and monetary systems. Management, marketing, and financial business
considerations are addressed as they interact in a dynamic international
marketplace. BILLABLE CONTACT HOURS: 3

BUS 2450 Internship/Co-op II .......................... 3 Credit Hours
Equivalent: BUS 2403
English/ESL Placement: Placement into ENG 1510.
Prerequisite: BUS 1450 and consent of instructor.
The advanced internship student will continue his or her employment in
a position of responsibility as a supervisory or management trainee in a
specific business within the student's career field. BILLABLE CONTACT
HOURS: 3

BUS 2530 Management .................................. 3 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: BUS 1100 or consent of instructor.
This course examines generally-accepted, major management concepts.
Students will individually and in groups demonstrate their understanding of
planning, organizing, empowering, changing and controlling organizations.
They will be exposed to current problems in business ethics and business
practice in a global economy. Additionally, this course offers insights as
to how and when these concepts might be practically applied in the
workplace. BILLABLE CONTACT HOURS: 3

BUS 2600 Principles of Advertising .................... 3 Credit Hours
Equivalent: MKT 2010 | MKT 2010
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
The course will provide an introduction to the world of advertising and
how it fits in with the marketing concept. The course will focus on the
elements of effective and ineffective advertising as well as an extensive
concentration of media, advertising agencies, consumer research,
advertising planning and budgeting. The course will expose the student
to careers in advertising, legal requirements and the advertising campaign
in addition to the global aspects of advertising. BILLABLE CONTACT
HOURS: 3

BUS 2640 Marketing Fundamentals ...................... 3 Credit Hours
Equivalent: MKT 2520 | MKT 2520
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: BUS 1100 or consent of instructor.
The course explores the contemporary process of marketing. The
course promotes an understanding of such functions as retailing,
pricing, wholesaling, advertising, market research, physical distribution,
promotion, and personal selling. The course, which will emphasize a
global perspective, will also focus on consumer behavior, buyer behavior
and market segmentation. BILLABLE CONTACT HOURS: 3

BUS 2700 Business and Labor Relations ............. 3 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: BUS 1310 or BUS 2530
This course examines various labor acts and their impact on both labor
and management, as well as significant philosophies pursued by both
labor and management. Additionally, this course will also consider
techniques employed by first-line supervisors who seek to implement labor
contracts. Case studies will be used. BILLABLE CONTACT HOURS: 3

BUS 2800 Human Resource Management ............ 3 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
This course introduces fundamental concepts of human resource
management by examining employment law, recruitment and selection,
compensation, performance appraisal, training and development,
employee benefits and services, occupational health and safety, and
personnel records and systems. BILLABLE CONTACT HOURS: 3

CIS 1000 Computer Literacy ............................ 1 Credit Hour
English/ESL Placement: Placement into ENG 1055 or higher (or
placement into ESL 1011 or higher for students taking the ESL sequence
of courses.)
Note: DUE TO FEDERAL REGULATION THIS COURSE IS NOT
ELIGIBLE FOR FEDERAL FINANCIAL AID.
Students will be provided an understanding of fundamental computer
concepts and personal computer operation. Students will utilize a personal
computer to acquire basic skills necessary to power up a computer
and access common computer programs. Topics to be covered include
elementary word processing, system commands and operation, and
general computer concepts. Students will be required to complete
computer-based assignments outside of class. BILLABLE CONTACT
HOURS: 1

CIS 1050 Personal Computer Productivity Tools ...... 4 Credit Hours
Equivalent: DPR 1030 | DPR 1010
English/ESL Placement: Placement into ENG 1060 or higher (or
placement into ESL 2510 or higher for students taking the ESL sequence
of courses).
Students will be introduced to the essentials of personal computer usage.
Students will explore and utilize software products such as business
graphics, Internet usage, spreadsheets, databases, and word processing.
Material in this course will assist students in the use of common desktop
productivity tools used by most other disciplines. Refer to the specific
section using OCC's online system for the software package being used.
Students will be required to complete computer-based assignments inside/ 
outside of class. BILLABLE CONTACT HOURS: 4

CIS 1060 Personal Computer Spreadsheet Concepts ...... 3 Credit Hours
Equivalent: DPR 1060
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Students will use a personal computer spreadsheet package to solve
problems and develop solutions that lend themselves to the spreadsheet
environment. Topics covered include spreadsheet menus, macros,
charting, importing data files, graphics facilities, data tables and creating
web pages. Refer to the specific section using OCC's online system
for the software package being used. Students will be required to
complete computer-based assignments inside/outside of class. BILLABLE
CONTACT HOURS: 3
CIS 1070  Personal Computer Presentation Concepts   ......3 Credit Hours

**English/ESL Placement:** Placement into ENG 1510 or ESL 2520.

Students will utilize a personal computer presentation package to create software-based slide show presentations. Topics covered include planning an effective slide presentation; creating and editing a presentation by adding, deleting and modifying slides and slide content; creating tables and charts; using design templates; adding transition, animation and sound effects; and inserting clip art. Linking and embedding objects from other programs, setting up a self-running presentation and setting up a presentation to run on another computer will also be covered. Refer to the specific section using OCC's online system for the software package being used. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 3

CIS 1080  Personal Computer Database Concepts   ......3 Credit Hours

**Equivalent:** DPR 1080

**English/ESL Placement:** Placement into ENG 1510 or ESL 2520.

Students will use a personal computer database package to implement database solutions in common application areas involving personal computers. Topics covered include relational database concepts, menus, queries, report writing features, screen design, importing and exporting data files, macros and creating hyperlinks and web pages. Refer to the specific section using OCC's online system for the software package being used. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 3

CIS 1090  Web Graphic Concepts   ....................3 Credit Hours

**English/ESL Placement:** Placement into ENG 1510 or ESL 2520.

This course will introduce students to the fundamental concepts, techniques and tools for understanding, creating and manipulating graphics (image files) suitable for use on web pages. Students will learn to use a graphics editor to create image based web components such as banners, buttons, GIF animation, splash page graphics, montages and will also learn to integrate those components to create an overall interface for a website. Students will learn about file formats, image compression techniques, web page typography, color choices for web pages as well as layout and composition for web-based projects. Students will create a web-based portfolio of all the graphics created during the course of the semester. BILLABLE CONTACT HOURS: 3

CIS 1200  Introduction to Database Systems   ......4 Credit Hours

**Equivalent:** DPR 1200

**English/ESL Placement:** Placement into ENG 1510 or ESL 2520.

This course will focus on the fundamentals of database systems. Students will study the basics of database vs. file management systems; functions, components, and personnel involved in a database; database, client-server, and transaction processing architectures; and relational data models and operations. Students will also study business requirements analysis, perform data definition, manipulation, and queries using basic SQL, create forms and reports; and analyze macros, procedures and triggers. Concepts of database planning, design, and administration fundamentals, data warehousing, and data mining will be covered. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 1300  Networking Concepts   ..........................4 Credit Hours

**English/ESL Placement:** Placement into ENG 1510 or ESL 2520.

Students will explore the components of networks and network designs. Communications hardware and the interconnection of servers and clients within LANs and WANs will be presented. Network architectures, standards, protocols and access methods used within intranets and the Internet will be described. The functions of network operating systems such as Windows Server and Unix/Linux will be explored. Centralized computing, client/server and peer-to-peer environments, their services and their program-to-program communication protocols will be presented. Data security and system component protection will be studied. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 1305  CCNA Studies I: Introduction to Networks   ......4 Credit Hours

**English/ESL Placement:** Placement into ENG 1510 or ESL 2520.

Introduction to Networks (ITN) covers the architecture, structure, functions and components of the Internet and other computer networks. Students are provided with a basic understanding of how networks operate and how to build simple local area networks (LAN), perform basic configurations for routers and switches, and implement Internet Protocol (IP). BILLABLE CONTACT HOURS: 4

CIS 1310  CCNA Studies II: Switching, Routing, and Wireless Essentials   .............................................4 Credit Hours

**English/ESL Placement:** Placement into ENG 1510 or ESL 2520.

Switching, Routing, and Wireless Essentials (SRWE) covers the architecture, components, and operations of routers and switches in small networks and introduces wireless local area networks (WLAN) and security concepts. Students learn how to configure and troubleshoot routers and switches for advanced functionality using security best practices and resolving common issues with protocols in both IPv4 and IPv6 networks. BILLABLE CONTACT HOURS: 4

CIS 1320  CCNA Studies III: Enterprise Networking, Security, and Automation   ........................................4 Credit Hours

**English/ESL Placement:** Placement into ENG 1510 or ESL 2520.

Enterprise Networking, Security, and Automation (ENSA) describes the architecture, components, operations, and security to scale for large, complex networks, including wide area network (WAN) technologies. The course emphasizes network security concepts and introduces network virtualization and automation. Students learn how to configure, troubleshoot, and secure enterprise network devices and understand how application programming interfaces (API) and configuration management tools enable network automation. BILLABLE CONTACT HOURS: 4

CIS 1330  CCNA Studies IV: Cybersecurity Operations   .....4 Credit Hours

**English/ESL Placement:** Placement into ENG 1510 or ESL 2520.

CCNA Cybersecurity Operations provides an introduction to the knowledge and skills needed for a Security Analyst working with a Security Operations Center team. It teaches core security skills needed for monitoring, detecting, investigating, analyzing and responding to security events, thus protecting systems and organizations from cybersecurity risks, threats and vulnerabilities. BILLABLE CONTACT HOURS: 4
CIS 1400  Web Design I  4 Credit Hours  
Equivalent: CIS 1510 | CIS 1110  
English/ESL Placement: Placement into ENG 1510 or ESL 2520.  
This course focuses on the fundamentals of web site content  
development. Students will be introduced to the fundamental HTML5  
structure of a webpage and then proceed to creating pages using a  
professional web editing tool. Students will create a fully functional  
original website using the web design editing tool that has elements  
such as images, hyperlinks, cascading style sheets for formatting, tables  
and integration of certain multimedia elements such as sound files and  
videos. Discussions will include accessibility of the design, overall site  
maintenance and publishing using FTP technologies. Students taking this  
course should have working knowledge of Windows and basic knowledge  
of the Internet. BILLABLE CONTACT HOURS: 4

CIS 1420  HTML5 Programming  3 Credit Hours  
Equivalent: CIS 2781  
English/ESL Placement: Placement into ENG 1510 or ESL 2520.  
This course focuses on designing and coding internet web pages using  
HTML5. The student will develop web pages by designing, entering, and  
testing code using this standard (with a simple text editor) rather than by  
using web development tools. Topics include - HTML5 element structure,  
web forms, multimedia, style sheets (CSS3) to apply formatting and layout  
characteristics in addition to applying special effects. This course will also  
include an introduction to the JavaScript programming language. Students  
should be familiar with the basics of both word processing and Windows  
file management techniques before enrolling in this course. BILLABLE  
CONTACT HOURS: 3

CIS 1440  JavaScript Programming for Websites  4 Credit Hours  
Equivalent: CIS 1125  
English/ESL Placement: Placement into ENG 1510 or ESL 2520.  
Prerequisite: CIS 1420  
Note: Prerequisites for courses in this department are not automatically  
waived for College Guest students and students with a bachelor's degree  
or higher from a U.S. institution.  
This course introduces the student to the fundamentals of JavaScript as  
a client-side scripting language for the purpose of developing dynamic  
Web-based applications that run within a Web browser. Emphasis is  
placed on programming techniques and Web technology. Topics include  
functions, data types, operators, strings, arrays, control structures, form  
validation, event handling, the Document Object Model, and debugging.  
Students should be familiar with fundamental computer usage, word  
processing, and HTML prior to enrolling in this class. Students will be  
required to complete computer-based assignments inside and outside of  
class. BILLABLE CONTACT HOURS: 4

CIS 1500  Introduction to Programming (Java)  4 Credit Hours  
English/ESL Placement: Placement into ENG 1510 or ESL 2520.  
Students should have elementary Algebra skills and be familiar with both  
elementary word processing and file management techniques prior to  
enrolling in this class. Students will be introduced to the fundamental  
techniques and syntax for understanding, designing, constructing,  
debugging, and testing object-oriented programs by studying the Java  
programming language. The structured programming basics of process,  
selection and iteration will be covered as well as primitive and complex  
data typing, methods, parameters and input/output. The basics of  
graphical user interface (GUI) programming such as event handling,  
windows and widgets will be introduced. Fundamental object-oriented  
concepts of classes, methods, abstraction, encapsulation and inheritance  
will also be introduced. Students will be required to complete computer-  
based assignments inside/outside of class. BILLABLE CONTACT  
HOURS: 4

CIS 1512  Principles of Software Engineering  3 Credit Hours  
English/ESL Placement: Placement into ENG 1510 or ESL 2520.  
This course is designed for aspiring security professionals, system or  
network administrators, or other information technology professionals  
who want to learn about computer security. Students will be well prepared  
for the Security+ Exam after taking this class. This course focuses on  
general security concepts, communication security, infrastructure security,  
basics of cryptography, and operational organizational security. Students  
will be required to complete computer-based assignments inside and  
outside of class. Students should have a basic understanding of computer  
networking prior to enrolling in this class. BILLABLE CONTACT HOURS: 4

English/ESL Placement: Placement into ENG 1510 or ESL 2520.  
Prerequisites for courses in this department are not automatically  
waived for College Guest students and students with a bachelor's degree  
or higher from a U.S. institution.  
This course introduces the student to the fundamentals of JavaScript as  
a client-side scripting language for the purpose of developing dynamic  
Web-based applications that run within a Web browser. Emphasis is  
placed on programming techniques and Web technology. Topics include  
functions, data types, operators, strings, arrays, control structures, form  
validation, event handling, the Document Object Model, and debugging.  
Students should be familiar with fundamental computer usage, word  
processing, and HTML prior to enrolling in this class. Students will be  
required to complete computer-based assignments inside and outside of  
class. BILLABLE CONTACT HOURS: 4

CIS 1600  Fundamentals of Cybersecurity  4 Credit Hours  
Equivalent: CIS 2839 | CIS 2839  
English/ESL Placement: Placement into ENG 1510 or ESL 2520.  
Note: Prerequisites for courses in this department are not automatically  
waived for College Guest students and students with a bachelor's degree  
or higher from a U.S. institution.  
This course is designed for aspiring security professionals, system or  
network administrators, or other information technology professionals  
who want to learn about computer security. Students will be well prepared  
for the Security+ Exam after taking this class. This course focuses on  
general security concepts, communication security, infrastructure security,  
basics of cryptography, and operational organizational security. Students  
will be required to complete computer-based assignments inside and  
outside of class. Students should have a basic understanding of computer  
networking prior to enrolling in this class. BILLABLE CONTACT HOURS: 4

Accounting  5
CIS 1610  Data Security .............................................4 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: CIS 1600
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.
This course is focused on the structure of data and database systems, their vulnerabilities to cyber attacks, and the proper techniques required to protect these systems from damage. Material covered will include: analysis of database-related malware; data system architecture; database system installation and configuration; data access controls and authentication; data security tools and devices; and security testing and auditing. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 1620  Introduction to Cryptography ..................4 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: CIS 1600
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.
This course is focused on basic techniques of encryption and decryption and their application to computer security. Topics covered will include: basic number theory and finite field arithmetic used in cryptography; symmetric ciphers; asymmetric ciphers; block and stream ciphers; implementation of popular encryption algorithms (e.g., AES); hash algorithms; digital signatures; and key management and distribution. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 1630  Security Policy, Legal, Ethics and Compliance ........................................3 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: CIS 1600
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.
This course provides a comprehensive introduction to the identification, selection, assessment, and continuous monitoring of management controls that provide a cyber security governance structure throughout an organization and its supply chain. The course will emphasize security policies and frameworks, their organizational implications, to the psychology, ethics, and legal considerations of their implementation.
BILLABLE CONTACT HOURS: 3

CIS 1720  Multimedia Data Management ............... 4 Credit Hours
Equivalent: CIS 1001
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
This course will give students a broad foundation in issues surrounding multimedia, including the role of and design of multimedia systems which incorporate digital audio, graphics and video, underlying concepts and representations of sound, pictures and video, data compression, transmission and storage, integration of media, multimedia authoring, and delivery of multimedia. Course will also include industry overview, societal issues, cultural implications, visual literacy and career opportunity. The students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 1721  Web Design II ......................................3 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: CIS 1400 or consent of instructor.
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.
This course will provide students with intermediate to advanced skills in web publishing focusing on abilities to design web pages with variations in web browsers in mind. Students will continue to work with a web design editing tool and create pages that include forms, validation, and cascading style sheet based design layout. Students will create a website that is ADA (American Disabilities Act) compliant. Students should be familiar with elementary word processing and MS Windows file management techniques prior to enrolling in this class. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 3

CIS 1801  Special Topics I: Network Remediation .....3 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: The prerequisite for a special topics section will depend on the content of that section. Refer to the specific section using OCC's online system for a description of the current course and its associated prerequisites.
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.
Network Remediation. BILLABLE CONTACT HOURS: 3

CIS 1802  Special Topics I: Introduction to Cybersecurity and Risk Management ........................................3 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: The prerequisite for a special topics section will depend on the content of that section. Refer to the specific section using OCC's online system for a description of the current course and its associated prerequisites.
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.
Introduction to Cybersecurity and Risk Management. BILLABLE CONTACT HOURS: 3
CIS 1803  Special Topics I  ............................. 1-4 Credit Hours

English/ESL Placement: Placement into ENG 1510.
Prerequisite: The prerequisite for a special topics section will depend on the content of that section. Refer to the specific section using OCC's online system for a description of the current course and its associated prerequisites.

Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

Students will be introduced to a particular contemporary topic or issue in information science that is relevant in today's environment. Refer to the specific section using OCC's online system for current topics. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 1 - 4

CIS 1804  Special Topics I: Macro Media Director  ...... 4 Credit Hours

English/ESL Placement: Placement into ENG 1510.
Prerequisite: The prerequisite for a special topics section will depend on the content of that section. Refer to the specific section using OCC's online system for a description of the current course and its associated prerequisites.

Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

Macro Media Director. BILLABLE CONTACT HOURS: 4

CIS 2111  Systems Analysis and Design (UML)  .......... 4 Credit Hours

Equivalent: CIS 2030 | DPR 2030

English/ESL Placement: Placement into ENG 1510 or ESL 2520.

Students should be familiar with the basics of both word processing and Windows file management techniques before enrolling in this course. Students will survey and practice the techniques used by system analysts and programmers in the analysis and design of computer-based business information systems with focus on the Unified Modeling Language (UML). Both traditional and object-oriented methods will be presented. System and object-oriented development life cycles (SDLC and ODLC) and subjects in computer-aided software engineering (CASE) such as project management, requirements modeling, data flow and entity relationship diagrams (DFD and ERD) and data dictionaries are among the included topics. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 2115  Business Analysis and Processes  .......... 4 Credit Hours

English/ESL Placement: Placement into ENG 1510 or ESL 2520.

Prerequisite: CIS 1050 CIS 1060 CIS 1200 and CIS 2111.

Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

In this course emphasis will be placed on tools and techniques to help with the analysis and process of solving business problems with technology. This course will cover process analysis, process flow diagrams, data analysis, predictive analysis and modeling, data modeling, Entity Relationship Diagrams (ERD), data dictionary, data mapping and the software tools available. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2120  Problem Solving and Information Technology  ...... 4 Credit Hours

English/ESL Placement: Placement into ENG 1510 or ESL 2520.

Prerequisite: CIS 1050 and CIS 1060.

Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

This course demonstrates how information technology impacts organizations, with an emphasis on using information technology to solve problems and introduces the need for business processes and IT alignment. Topics include main concepts of information technology at a general level, on-line collaboration tools, application software, and information literacy as applied to searching and using the Internet. In addition, students will use application software at an intermediate level and apply it to problem solving scenarios. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2131  Python Programming  ....................... 4 Credit Hours

English/ESL Placement: Placement into ENG 1510 or ESL 2520.

The course will introduce the fundamental techniques and syntax for understanding, designing, constructing, debugging, and testing object-oriented programs using the Python programming language. The structured programming basics of process, selection and iteration will be covered as well as primitive and complex data typing, methods, parameters and input/output. Fundamental object-oriented concepts of classes, methods, abstraction, encapsulation and inheritance will also be introduced. Students will be required to complete computer-based assignments inside/outside of class. Students should have elementary algebra skills and be familiar with both elementary word processing and file management techniques prior to enrolling in this class. BILLABLE CONTACT HOURS: 4

CIS 2141  R Programming for Data Science  .......... 4 Credit Hours

English/ESL Placement: Placement into ENG 1510 or ESL 2520.

Prerequisite: MAT 1150 or placement into a higher level math course.

Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

This course will teach students how to program in R for effective data analysis; how to install and configure software necessary for a statistical programming environment and describe generic programming language concepts as they are implemented in a high-level statistical language. The course covers practical issues in statistical computing which includes programming in R, reading data into R, accessing R packages, writing R functions, and debugging R code. Students will learn data structuring, transforming, visualizing, and modeling through hands on exercises. Students should be familiar with both elementary word processing and file management techniques prior to enrolling in this class. BILLABLE CONTACT HOURS: 4
CIS 2151  Object-Oriented Programming (Java)  . 4 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: CIS 1500
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor’s degree or higher from a U.S. institution.

Students will be exposed to more complicated programming problems and will study the techniques and structures used to solve these problems with the Java language. Topics include exception handling, file input and output, composition, inheritance, polymorphism, abstract classes and interfaces. Advanced Graphic User Interface (GUI) design and implementation techniques will be covered. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 2212  Project Management  4 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Students should be familiar with the basics of both word processing and Windows file management techniques before enrolling in this course. This course focuses on management strategies and analysis of business information systems projects. Project management issues and techniques specific to projects will be emphasized. Emphasis is on creating plans and implementing projects that are within budget, on time, and deliver useful results. Technology and project management standards, design tools (e.g., UML), product evaluation criteria, infrastructure integration, and communication of technical implementation details will be covered in group discussion and project work. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2221  Fundamentals of System Support  4 Credit Hours
Equivalent: DPR 2050
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Students will be introduced to the basic software and hardware concepts and facilities needed for simple support tasks. Topics covered include system boot sequences, disk partitioning, disk fragmentation, system configuration files, types of memory and memory management, basic OS commands and batch file construction. Emphasis is given to the Windows OS relationships and facilities. Hardware factors related to system and software evaluation, selection, purchase and installation are presented. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 2241  Discrete Structures  4 Credit Hours
Prerequisite: MAT 1150 or placement into a higher level math course.
CIS 1500 or CIS 2131 or CIS 2151 or CIS 2252 or CIS 2656 or CIS 2757
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor’s degree or higher from a U.S. institution.

This course provides an introduction to discrete structures, covering topics such as mathematical logic, set theory, trees, matrices, and graphs, as they apply to computer science, data science, and software engineering. Programming applications of matrices as used in computer science will be covered. BILLABLE CONTACT HOURS: 4

CIS 2252  Object-Oriented Programming (C++)  4 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Students should have a basic understanding of general programming concepts and techniques prior to enrolling in this class. Students will be instructed in the syntax and semantics of the ANSI C++ language. Topics covered include control structures, arrays, pointers, strings, dynamic memory management, class definition and object-based development, file I/O, overloading, exception handling, and template libraries. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 2313  E-Business and E-Commerce  4 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Students should have a basic knowledge of Internet technologies before enrolling in this course. Introduction is provided to a broad range of theories, practices, standards, and procedures related to the strategic implementation of e-commerce systems aimed at supporting one or more organizational business initiatives. A series of topics will be presented and cases analyzed that teach the student material ranging from: e-commerce business models, e-commerce technologies, supporting standards, to ecommerce analysis and design methodologies. The students will be required to complete computer-based assignments inside/outside of class.
BILLABLE CONTACT HOURS: 4

CIS 2333  Web System Administration  4 Credit Hours
English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1300
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor’s degree or higher from a U.S. institution.

This course focuses on the operation and administration of Web application servers such as Apache HTTP, IIS, Tomcat and WebSphere. Students will study the basic structure and function of Web servers as well as the common tasks and services performed by administrators. Topics include Web protocols and related networking; Web server installation and configuration; integration with other essential services such as email, database management, file transfer, domain name services, and authentication; security; monitoring and performance; and virtualization. Students will be required to complete computer-based assignments inside and outside of class.
BILLABLE CONTACT HOURS: 4

CIS 2353  Data Structures  4 Credit Hours
Equivalent: DPR 2810
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: CIS 1500 or CIS 2131 or CIS 2252 or CIS 2757
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor’s degree or higher from a U.S. institution.

Students will investigate the programming techniques and theories involved in implementing linked lists, queues, stacks and tree structures. Recursion, searching techniques and sorting algorithms will also be considered. Students will be required to complete computer-based assignments inside and outside of class.
BILLABLE CONTACT HOURS: 4
CIS 2434 Introduction to Linux and Unix Administration ..... 3 Credit Hours
Equivalent: CIS 2332
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Students should be familiar with elementary word processing and basic computer concepts prior to enrolling in this course. This hands-on class covers the concepts related to Linux/Unix installation and system administration. Students will install and administer a Linux/Unix operating system using a virtual machine software product. It is intended for students who plan to work as Linux/Unix system administrators or for those who plan to take one or more certification tests as part of their professional preparation. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 3

CIS 2454 Web System Development (PHP, Java) ..... 4 Credit Hours
Equivalent: CIS 1930
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: CIS 1500 or CIS 2151
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.
This course focuses on design and implementation techniques for Web-based application software. Server-side software design and development techniques associated with Web Developer job skills will be emphasized. Topics to be covered will include: Web application architecture; design patterns and application frameworks; PHP language basics; Java technologies for server-side Web development; database access; Extensible Markup Language (XML) and Asynchronous JavaScript and XML (AJAX)-based request processing; and Web application security. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2515 Database Design and Management with Oracle SQL ............................................................... 4 Credit Hours
Equivalent: DPR 2830
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: CIS 1200 or consent of instructor.
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.
This course will focus on design and management of database environments using Oracle SQL and associated Oracle technologies. Topics include enterprise information resource planning and object-oriented and entity-relationship data modeling methodologies, normalization and the relational model, logical and physical database design, and implementation, population and processing of a relational database for data access, report generation, database definition, data manipulation, and access control. Oracle-specific materials used in this course are designed to prepare students for the Oracle Database SQL exam which is the first exam required to become an Oracle Certified Associate or Oracle Certified Professional. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2535 Microsoft Windows Server Administration ..... 3 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Students should be familiar with the basics of both word processing and Microsoft Windows file management techniques and basic hardware, software, and network operating system, architecture, and protocol concepts needed for simple support tasks prior to enrolling in this course. Concepts of electronic business communications and local area networks will be covered. The Microsoft Windows Server operating system will be used and studied in this course. Installation of network operating system, setup of users and groups, files and folder trustee rights, and console management will be covered. Students will be required to complete computer-based assignments inside/outside of class. This course covers material in and prepares students for the first part of Microsoft's MCSD and MCSE certification tracks. BILLABLE CONTACT HOURS: 3

CIS 2541 Introduction to Machine Learning ..... 4 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: CIS 2131, MAT 1580
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.
This course provides an introduction to fundamental machine learning topics in the context of data science. Students will learn fundamental examples and applications of machine learning, and types of machine learning systems, including supervised, unsupervised, semi-supervised, and reinforcement. Discussion of major challenges and solutions will be covered as well. BILLABLE CONTACT HOURS: 4

CIS 2616 Database Application Design and Development with Oracle PL/SQL ........................................ 4 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: CIS 1200 or consent of instructor.
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.
This course will focus on design and development of database applications using Oracle PL/SQL, Oracle development tools, and use of Oracle XML data types for implementation of PL/SQL programs, procedures, functions, packages, and triggers. Oracle-specific materials used in this course are designed to prepare students for the Oracle Program with PL/SQL exam which is the second exam required to become an Oracle Certified Associate or Oracle Certified Professional. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2636 Network Administration ............................. 4 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: CIS 1300
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.
This course is designed for Information Technology professionals who want to learn advanced topics in network administration. Areas covered include topics like routing protocols, congestion control algorithms, Quality of Service. The student will also be exposed to network security, trouble shooting networks, remote access technologies like VPN and some router switch configuration. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4
CIS 2656  Visual Basic.NET Programming .............. 4 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: CIS 1200
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

This course focuses on software design and development techniques with the Visual Basic .NET programming language. Topics to be covered will include: Overview of the Microsoft .NET architecture; user interface forms and controls; variables, arrays, procedures, and control structures; object-oriented programming techniques; exception handling; data access with ADO.NET; and simple integration with Web technologies. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2737  Database Administration ..................... 4 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: CIS 1200
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

The purpose of the Database Administration course is to train students on typical activities performed by a database administrator (DBA) and on issues important to efficient performance of a database. The course will involve significant hands-on and lab work using the Oracle and/or MySQL server DBMS. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 2757  C# Programming .................................. 4 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: CIS 1200

Students should have a basic understanding of general programming concepts and techniques prior to enrolling in this course. This course focuses on the design and implementation of software using the C# programming language. Students will learn how to develop programs that utilize classes and objects, arrays, graphical user interfaces, event-driven programming and exception handling. Visual Studio .NET will be used as the primary integrated development environment. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2818  Mobile Application Development (Android) .... 4 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: CIS 1500 or consent of instructor.
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

This course focuses on the design and implementation of wireless handheld application software on the Android platform for business and personal use. Students will use the Android Studio integrated development environment (IDE) to develop and test application software. Development techniques will focus on operational aspects of mobile devices that distinguish them from PCs and general computing platforms. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2838  System Security ..................................... 4 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: CIS 1600

Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

This course is designed for aspiring security professionals, system or network administrators, or other information technology professionals who want to learn about computer security. Being a part of two courses, this part focuses on the security engineer who needs to worry about the attacks used by hackers and the defenses against them. The course makes an effort to understand defenses against Reconnaissance, Scanning, Gaining Access, Maintaining access and covering tracks. Last but not the least, the course covers computer ethics. The Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 2845  Computer Forensics ................................. 4 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: CIS 1600

Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

With ever growing reliance on computers for every day life projects, and increased focus on security and breach of security and privacy, there is a need for a course which can help security professionals and law enforcement agencies learn ways to investigate security breaches. This course is designed to introduce a variety of operating systems investigation techniques, incident response tactics, and legal issues. The course helps learn forensic techniques and tools for both Windows and Linux investigations. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4
CIS 2858  Web System Integration and Service Development .............................................4 Credit Hours

Equivalent: CIS 2414

English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: CIS 1500 or CIS 2151 or CIS 2454

Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

This course focuses on design and implementation strategies for integration of distributed client-server software and development of Web application services. Topics to be covered will include: Web middleware-related technologies such as the Java Enterprise Edition platform (Java EE), multi-tier application frameworks; Extensible Markup Language (XML) processing; Simple Object Access Protocol (SOAP); Representational State Transfer (RESTful) Web services; Web Services Description Language (WSDL); and Cloud Computing services. Students will use a popular IDE tool to create and integrate Web application components. Completion of computer-based assignments inside and outside of class will be required. BILLABLE CONTACT HOURS: 4

CIS 2859  Foundations of Game Software Development .......................................................4 Credit Hours

English/ESL Placement: Placement into ENG 1510 or ESL 2520.

Students should have a basic understanding of object-oriented programming prior to enrolling in this class. This course focuses on the fundamentals and techniques of game software development. Students will use a popular game engine and associated software tools to learn how various elements of games are created, integrated into a system, and used in game play. Game system elements include: game engine functions; scripts; graphical interface; models; terrains and worlds; textures; sound; and support infrastructure. Students will also apply mathematical foundations used in computer graphics. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2862  Game Design .................................................................3 Credit Hours

English/ESL Placement: Placement into ENG 1510 or ESL 2520.

This course is focused on the essential principles of designing game software. The philosophy of video games as a form of entertainment as well as important design concepts that feature player-centric approaches will be explored. Other topics to be covered include: the genres of games; design components and processes; game analysis frameworks; storyboarding; creative and expressive play; character development; storytelling and narrative; game play mechanics; defining appropriate physical models and game worlds; and level design. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 3

CIS 2980  Computer Service Technologies & Techniques A + .............................................4 Credit Hours

Equivalent: ECT 2150

English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: CIS 2232 or consent of instructor.

Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

This course provides the necessary preparation to take the industry standard Core Hardware Certification exams. Topics studies include, but are not limited to: core hardware requirements, installation, configuration and upgrading, diagnosing and troubleshooting, preventive maintenance, motherboard/processors/memory, basic networking and security. Students will be required to complete computer-based assignments outside of class. Note: certification exams are administered and charged separately by an outside agency. BILLABLE CONTACT HOURS: 4

CIS 2991  Special Project in Software Engineering .........................................................3 Credit Hours

English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: Successful completion of all required core courses in the CIS.SWE.CT CIS Software Engineering Certificate program: CIS 1200 CIS 1510 and CIS 2353. Complete a minimum of 6 credits in one focus area of the CIS.SWE.CT CIS Software Engineering Certificate program.

Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

This course is focused on development of material for a personal 'software' portfolio that may be used to support employment opportunity applications. Common tools and techniques used in work environments as well as typical workplace processes will be explored with the purpose of preparing students for employment as software developers. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4
