

Computer Information Systems - Cisco Internetworking Certificate of Achievement (CIS.CIN.CA)

Certificate of Achievement

Business, Management, Marketing and Technology

Auburn Hills Campus

The certificates of achievement differ from a traditional certificate program in that there is not an attempt to give the student a broad base of computer skills plus an emphasis in a particular specialized area. The achievement certificate is a shorter sequence of courses that focuses on one specific technical area. Therefore, this type of certificate may be more appropriate for working professionals seeking to add technical skills.
