**Computer Information Systems**

**Business, Management, Marketing and Technology**

**Auburn Hills and Orchard Ridge Campuses**

**Associate Degrees**

The Computer Information Systems (CIS) associate degrees are designed for students who need general education (e.g., communication, science, mathematics, fine arts, social science) combined with a solid foundation in the fundamental computer skills that are generally required to design, create, and test software, or analyze business system requirements and design solutions, or support and protect the operation of technology resources. These fundamental computer skills are commonly required by most four-year educational programs that offer the types of bachelor degrees most employers look for when hiring information technology professionals. All CIS courses use current computer tools and place an emphasis on practical application to provide a relevant learning environment.

Four CIS associate degree choices are available:

- Business Systems Analysis Option (CIS.BSA.AAS)
- Cybersecurity Option (CIS.CYS.AAS)
- Information Technology Support Option (CIS.ITS.AAS)
- Software Engineering Option (CIS.SWE.AAS)

**Certificates**

The Computer Information Systems (CIS) certificates are designed for students who need specialty skills in a particular area of information technology that will help satisfy current of future employment requirements. Unlike associate degrees, certificate programs assume that students already have obtained or do not require general education skills and are now looking for education in a specific area of computer technology. Therefore, all of the courses within a certificate program are chosen to develop these specific technical skills in a shorter amount of time than what would be required in an associate degree program.

Five CIS certificate choices are available. Two of the five choices (Software Engineering and Information Technology Support) are fairly broad areas that require multiple types of focus areas within them. The courses within each focus area have been chosen to match with popular employer requirements for that particular skill type.

- Cybersecurity Certificate (CIS.CYS.CT)
- Data Science Certificate (CIS.DSC.CT)
- Information Technology Support Certificate (CIS.ITS.CT)¹
  - Computer and Systems Support (focus area)
  - Database Technology and Administration (focus area)
  - Network Technology and Administration (focus area)
- Software Engineering Certificate (CIS.SWE.CT)¹
  - Game Design and Development (focus area)
  - General Software Development (focus area)
  - Mobile Application Development (focus area)
  - Web Application Development (focus area)
- Web Designer Certificate (CIS.WDE.CT)
- Cisco Internetworking Certificate of Achievement (CIS.CIN.CA)

1. A separate certificate is not awarded for each focus area. For the CIS.ITS.CT program, students choose 1 of 3 focus areas. For the CIS.SWE.CT program, students choose 1 of 4 focus areas.

**Other Training Options**

Professional certification preparation courses are offered through the OCC CIS department as well as the Economic and Workforce Development office. Industry exam preparation courses cover material from certifying organizations such as Microsoft, Cisco, Sun, Oracle, Novell, and CompTIA. Several exam preparation courses (e.g., CIS 1305, CIS 1310, CIS 1320, CIS 1330, CIS 1600, CIS 2434, CIS 2515, CIS 2535, CIS 2616, CIS 2980) offered for credit through the CIS department are listed in the OCC course catalog. Custom-designed non-credit courses for local businesses are also available through Workforce Development. CIS course details may be obtained by contacting the CIS department at the Orchard Ridge or Auburn Hills campus. Custom course details and related information may be obtained by contacting the Economic and Workforce Development office at (248) 232-4000 in the M-TEC building on the Auburn Hills Campus.

The M-TEC building also serves as a Pearson VUE Authorized Test Center where students can take official certification exams. Information about testing and related Economic and Workforce Development services is available within the OCC website at www.oaklandcc.edu (http://www.oaklandcc.edu/).

**Degrees**

- Computer Information Systems - Business Systems Analysis Option (CIS.BSA.AAS) (http://catalog.oaklandcc.edu/programs/computer-information-systems/business-systems-analysis-option-aas/) - Traditional or online program available
- Computer Information Systems - Cybersecurity Option (CIS.CYS.AAS) (http://catalog.oaklandcc.edu/programs/computer-information-systems/cybersecurity-option-aas/)
- Computer Information Systems - Information Technology Support Option (CIS.ITS.AAS) (http://catalog.oaklandcc.edu/programs/computer-information-systems/tech-support-option-aas/)
- Computer Information Systems - Software Engineering Option (CIS.SWE.AAS) (http://catalog.oaklandcc.edu/programs/computer-information-systems/software-engineering-option-aas/) - Traditional or online program available

**Certificates**

- Computer Information Systems - Cybersecurity Certificate (CIS.CYS.CT) (http://catalog.oaklandcc.edu/programs/computer-information-systems/cybersecurity-option-ct/)
- Computer Information Systems - Data Science Certificate (CIS.DSC.CT) (http://catalog.oaklandcc.edu/programs/computer-information-systems/data-science-ct/)
- Computer Information Systems - Information Technology Support Certificate (CIS.ITS.CT) (http://catalog.oaklandcc.edu/programs/computer-information-systems/tech-support-option-ct/)

1. Computer and Systems Support Focus Area or
2. Database Technology and Administration Focus Area or
3. Network Technology and Administration Focus Area
• Computer Information Systems - Software Engineering Certificate (CIS.SWE.CT) (http://catalog.oaklandcc.edu/programs/computer-information-systems/software-engineering-option-ct/)
  • Game Design and Development Focus Area or
  • General Software Development Focus Area or
  • Mobile Application Development Focus Area or
  • Web Application Development Focus Area
• Computer Information Systems - Web Designer Certificate (CIS.WDE.CT) (http://catalog.oaklandcc.edu/programs/computer-information-systems/web-designer-option-certificate/)

Certificate of Achievement

• Cisco Internetworking Certificate of Achievement (CIS.CIN.CA)

Computer Information Systems Courses

CIS 1000  Computer Literacy ............................................. 1 Credit Hour

English/ESL Placement: Placement into ENG 1055 or higher (or placement into ESL 1011 or higher for students taking the ESL sequence of courses.)

Note: DUE TO FEDERAL REGULATION THIS COURSE IS NOT ELIGIBLE FOR FEDERAL FINANCIAL AID.

Students will be provided an understanding of fundamental computer concepts and personal computer operation. Students will utilize a personal computer to acquire basic skills necessary to power up a computer and access common computer programs. Topics to be covered include elementary word processing, system commands and operation, and general computer concepts. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 1

CIS 1050  Personal Computer Productivity Tools ........ 4 Credit Hours

Equivalent: DPR 1030 | DPR 1010

English/ESL Placement: Placement into ENG 1060 or higher (or placement into ESL 2510 or higher for students taking the ESL sequence of courses).

Students will be introduced to the essentials of personal computer usage. Students will explore and utilize software products such as business graphics, Internet usage, spreadsheets, databases, and word processing. Material in this course will assist students in the use of common desktop productivity tools used by most other disciplines. Refer to the specific section using OCC's online system for the software package being used. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 1060  Personal Computer Spreadsheet Concepts ....... 3 Credit Hours

Equivalent: DPR 1060

English/ESL Placement: Placement into ENG 1510 or ESL 2520.

Students will use a personal computer spreadsheet package to solve problems and develop solutions that lend themselves to the spreadsheet environment. Topics covered include spreadsheet menus, macros, charting, importing data files, graphics facilities, data tables and creating web pages. Refer to the specific section using OCC's online system for the software package being used. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 3

CIS 1070  Personal Computer Presentation Concepts ....... 3 Credit Hours

Equivalent: DPR 1080

English/ESL Placement: Placement into ENG 1510 or ESL 2520.

Students will utilize a personal computer presentation package to create software-based slide show presentations. Topics covered include planning an effective slide presentation; creating and editing a presentation by adding, deleting and modifying slides and slide content; creating tables and charts; using design templates; adding transition, animation and sound effects; and inserting clip art. Linking and embedding objects from other programs, setting up a self-running presentation and setting up a presentation to run on another computer will also be covered. Refer to the specific section using OCC's online system for the software package being used. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 3

CIS 1080  Personal Computer Database Concepts ........ 3 Credit Hours

Equivalent: DPR 1090

English/ESL Placement: Placement into ENG 1510 or ESL 2520.

This course will introduce students to the fundamental concepts, techniques and tools for understanding, creating and manipulating graphics (image files) suitable for use on web pages. Students will learn to use a graphics editor to create image based web components such as banners, buttons, GIF animation, splash page graphics, montages and will also learn to integrate those components to create an overall interface for a website. Students will learn about file formats, image compression techniques, web page typography, color choices for web pages as well as layout and composition for web-based projects. Students will create a web-based portfolio of all the graphics created during the course of the semester. BILLABLE CONTACT HOURS: 3

CIS 1200  Introduction to Database Systems ............ 4 Credit Hours

Equivalent: DPR 1200

English/ESL Placement: Placement into ENG 1510 or ESL 2520.

This course will focus on the fundamentals of database systems. Students will study the basics of database vs. file management systems; functions, components, and personnel involved in a database; database, client-server, and transaction processing architectures; and relational data models and operations. Students will also study business requirements analysis, perform data definition, manipulation, and queries using basic SQL, create forms and reports, and analyze macros, procedures and triggers. Concepts of database planning, design, and administration fundamentals, data warehousing, and data mining will be covered. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4
CIS 1300  Networking Concepts  4 Credit Hours
Equivalent: CIS 2710
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Students should be familiar with fundamental computer usage, word
processing, client/server and peer-to-peer environments, their services and
their program-to-program communication protocols will be presented. Data
security and system component protection will be studied. Students will be
required to complete computer-based assignments inside/outside of class.
BILLABLE CONTACT HOURS: 4

CIS 1305  CCNA Studies I: Introduction to Networks  4 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Introduction to Networks (ITN) covers the architecture, structure, functions
and components of the Internet and other computer networks. Students are
provided with a basic understanding of how networks operate and how
to build simple local area networks (LAN), perform basic configurations
for routers and switches, and implement Internet Protocol (IP). BILLABLE
CONTACT HOURS: 4

CIS 1310  CCNA Studies II: Switching, Routing, and Wireless Essentials  4 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Switching, Routing, and Wireless Essentials (SRWE) covers the
architecture, components, and operations of routers and switches in
small networks and introduces wireless local area networks (WLAN) and
security concepts. Students learn how to configure and troubleshoot
routers and switches for advanced functionality using security best
practices and resolving common issues with protocols in both IPv4 and
IPv6 networks. BILLABLE CONTACT HOURS: 4

CIS 1320  CCNA Studies III: Enterprise Networking, Security, and Automation  4 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Enterprise Networking, Security, and Automation (ENSA) describes the
architecture, components, operations, and security for scale to large,
complex networks, including wide area network (WAN) technologies.
The course emphasizes network security concepts and introduces
network virtualization and automation. Students learn how to configure,
troubleshoot, and secure enterprise network devices and understand how
application programming interfaces (API) and configuration management
tools enable network automation. BILLABLE CONTACT HOURS: 4

CIS 1330  CCNA Studies IV: Cybersecurity Operations  4 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
CCNA Cybersecurity Operations provides an introduction to the
knowledge and skills needed for a Security Analyst working with a
Security Operations Center team. It teaches core security skills needed for
monitoring, detecting, investigating, analyzing and responding to security
events, thus protecting systems and organizations from cybersecurity
risks, threats and vulnerabilities. BILLABLE CONTACT HOURS: 4

CIS 1400  Web Design I  4 Credit Hours
Equivalent: CIS 1510 | CIS 1110
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
This course focuses on the fundamentals of web site content
development. Students will be introduced to the fundamental HTML5
structure of a webpage and then proceed to creating pages using a
professional web editing tool. Students will create a fully functional
original website using the web design editing tool that has elements
such as images, hyperlinks, cascading style sheets for formatting, tables
and integration of certain multimedia elements such as sound files and
videos. Discussions will include accessibility of the design, overall site
maintenance and publishing using FTP technologies. Students taking this
course should have working knowledge of Windows and basic knowledge
of the Internet. BILLABLE CONTACT HOURS: 4

CIS 1420  HTML5 Programming  3 Credit Hours
Equivalent: CIS 2781
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
This course focuses on designing and coding internet web pages using
HTML5. The student will develop web pages by designing, entering, and
testing code using this standard (with a simple text editor) rather than by
using web development tools. Topics include - HTML5 element structure,
web forms, multimedia, style sheets (CSS3) to apply formatting and layout
characteristics in addition to applying special effects. This course will also
include an introduction to the JavaScript programming language. Students
should be familiar with the basics of both word processing and Windows
file management techniques before enrolling in this course. BILLABLE
CONTACT HOURS: 3

CIS 1440  JavaScript Programming for Websites  4 Credit Hours
Equivalent: CIS 1125
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: CIS 1420
Note: Prerequisites for courses in this department are not automatically
waived for College Guest students and students with a bachelor's degree
or higher from a U.S. institution.
This course introduces the student to the fundamentals of JavaScript as
a client-side scripting language for the purpose of developing dynamic
Web-based applications that run within a Web browser. Emphasis is
placed on programming techniques and Web technology. Topics include
functions, data types, operators, strings, arrays, control structures, form
validation, event handling, the Document Object Model, and debugging.
Students should be familiar with fundamental computer usage, word
processing, and HTML prior to enrolling in this class. Students will be
required to complete computer-based assignments inside and outside of
class. BILLABLE CONTACT HOURS: 4
CIS 1500  Introduction to Programming (Java)  ...... 4 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Students should have elementary Algebra skills and be familiar with both
elementary word processing and file management techniques prior to
enrolling in this class. Students will be introduced to the fundamental
techniques and syntax for understanding, designing, constructing,
debugging, and testing object-oriented programs by studying the Java
programming language. The structured programming basics of process,
selection and iteration will be covered as well as primitive and complex
data typing, methods, parameters and input/output. The basics of
graphical user interface (GUI) programming such as event handling,
windows and widgets will be introduced. Fundamental object-oriented
concepts of classes, methods, abstraction, encapsulation and inheritance
will also be introduced. Students will be required to complete computer-
based assignments inside/outside of class. BILLABLE CONTACT
HOURS: 4

CIS 1512  Principles of Software Engineering  ...... 3 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
This course is focused on formal methods and approaches used in the
design, development, testing and maintenance of computer software.
Each stage of the software development life cycle (SDLC) will be studied
detail. Topics such as low-level design, high-level design, modeling
with UML (Unified Modeling Language), iterative development models,
rapid application development (RAD), formal testing methods, incremental
deployment, formal metrics, as well as appropriate use of associated tools
will be covered with practical applications. Students will be required to
complete computer-based assignments inside/outside of class. BILLABLE CONTACT
HOURS: 3

CIS 1550  Introduction to Secure Programming  ...... 3 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
This course presents cybersecurity content related to analyzing software
risks, understanding likely points of application attack, and making
preliminary decisions about how software applications mitigate attack.
The student will learn how to identify systemic threats in any deployment
environment, understand the vulnerabilities of common software
applications, and how to construct software that are responsive to
identified vulnerabilities. BILLABLE CONTACT HOURS: 3

CIS 1600  Fundamentals of Cybersecurity  .......... 4 Credit Hours
Equivalent: CIS 2839 | CIS 2839
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Note: Prerequisites for courses in this department are not automatically
waived for College Guest students and students with a bachelor's degree
or higher from a U.S. institution.
This course is designed for aspiring security professionals, system or
network administrators, or other information technology professionals
who want to learn about computer security. Students will be well prepared
for the Security+ Exam after taking this class. This course focuses on
general security concepts, communication security, infrastructure security,
basics of cryptography, and operational organizational security. Students
will be required to complete computer-based assignments inside and
outside of class. Students should have a basic understanding of computer
networking prior to enrolling in this class. BILLABLE CONTACT HOURS: 4

CIS 1610  Data Security  .................................. 4 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: CIS 1600
Note: Prerequisites for courses in this department are not automatically
waived for College Guest students and students with a bachelor's degree
or higher from a U.S. institution.
This course is focused on the structure of data and database systems,
their vulnerabilities to cyber attacks, and the proper techniques required
to protect these systems from damage. Material covered will include:
analysis of database-related malware; data system architecture;
database system installation and configuration; data access controls
and authentication; data security tools and devices; and security testing
and auditing. Students will be required to complete computer-based
assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 1620  Introduction to Cryptography  ............ 4 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: CIS 1600
Note: Prerequisites for courses in this department are not automatically
waived for College Guest students and students with a bachelor's degree
or higher from a U.S. institution.
This course is focused on basic techniques of encryption and decryption
and their application to computer security. Topics covered will include:
basic number theory and finite field arithmetic used in cryptography;
symmetric ciphers; asymmetric ciphers; block and stream ciphers;
implementation of popular encryption algorithms (e.g., AES); hash
algorithms; digital signatures; and key management and distribution.
Students will be required to complete computer-based assignments inside
and outside of class. BILLABLE CONTACT HOURS: 4

CIS 1630  Security Policy, Legal, Ethics and
Compliance ................................................. 3 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: CIS 1600
Note: Prerequisites for courses in this department are not automatically
waived for College Guest students and students with a bachelor's degree
or higher from a U.S. institution.
This course provides a comprehensive introduction to the identification,
selection, assessment, and continuous monitoring of management
controls that provide a cyber security governance structure throughout
an organization and its supply chain. The course will emphasize security
policies and frameworks, their organizational implications, to the
psychology, ethics, and legal considerations of their implementation.
BILLABLE CONTACT HOURS: 3

CIS 1720  Multimedia Data Management  .......... 4 Credit Hours
Equivalent: CIS 1001
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
This course will give students a broad foundation in issues surrounding
multimedia, including the role of and design of multimedia systems
which incorporate digital audio, graphics and video, underlying concepts
and representations of sound, pictures and video, data compression,
transmission and storage, integration of media, multimedia authoring,
and delivery of multimedia. Course will also include industry overview, societal
issues, cultural implications, visual literacy and career opportunity. The
students will be required to complete computer-based assignments inside/
outside of class. BILLABLE CONTACT HOURS: 4
CIS 1721  Web Design II  ...........................................  3 Credit Hours

English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: CIS 1400 or consent of instructor.
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

This course will provide students with intermediate to advanced skills in web publishing focusing on abilities to design web pages with variations in web browsers in mind. Students will continue to work with a web design editing tool and create pages that include forms, validation, and cascading style sheet based design layout. Students will create a website that is ADA (American Disabilities Act) compliant. Students should be familiar with elementary word processing and MS Windows file management techniques prior to enrolling in this class. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 3

CIS 1722  Web Animation  ................................. 3 Credit Hours

English/ESL Placement: Placement into ENG 1510 or ESL 2520.

This course will provide introductory level knowledge of effectively working with vector based design applications aimed at the creation of animation, games, and interactive components for use on the internet. Students will focus on the creation of basic animation and navigation components for use on web sites as well as for projects aimed at offline use. Students taking this course should have basic Windows background and general knowledge of internet technologies. BILLABLE CONTACT HOURS: 3

CIS 1801  Special Topics I: Network Remediation  ..... 3 Credit Hours

English/ESL Placement: Placement into ENG 1510.
Prerequisite: The prerequisite for a special topics section will depend on the content of that section. Refer to the specific section using OCC's online system for a description of the current course and its associated prerequisites.
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

Network Remediation. BILLABLE CONTACT HOURS: 3

CIS 1802  Special Topics I: Introduction to Cybersecurity and Risk Management  ...........................................  3 Credit Hours

English/ESL Placement: Placement into ENG 1510.
Prerequisite: The prerequisite for a special topics section will depend on the content of that section. Refer to the specific section using OCC's online system for a description of the current course and its associated prerequisites.
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

Introduction to Cybersecurity and Risk Management. BILLABLE CONTACT HOURS: 3

CIS 1803  Special Topics I  ....................................... 1-4 Credit Hours

English/ESL Placement: Placement into ENG 1510.
Prerequisite: The prerequisite for a special topics section will depend on the content of that section. Refer to the specific section using OCC's online system for a description of the current course and its associated prerequisites.
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

Students will be introduced to a particular contemporary topic or issue in information science that is relevant in today's environment. Refer to the specific section using OCC's online system for current topics. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 1 - 4

CIS 1804  Special Topics I: Macro Media Director  ..... 4 Credit Hours

English/ESL Placement: Placement into ENG 1510.
Prerequisite: The prerequisite for a special topics section will depend on the content of that section. Refer to the specific section using OCC's online system for a description of the current course and its associated prerequisites.
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

Macro Media Director. BILLABLE CONTACT HOURS: 4

CIS 2111  Systems Analysis and Design (UML)  4 Credit Hours Equivalent: CIS 2030 | DPR 2030

English/ESL Placement: Placement into ENG 1510 or ESL 2520.

Students should be familiar with the basics of both word processing and Windows file management techniques before enrolling in this course. Students will survey and practice the techniques used by system analysts and programmers in the analysis and design of computer-based business information systems with focus on the Unified Modeling Language (UML). Both traditional and object-oriented methods will be presented. System and object-oriented development life cycles (SDLC and ODLC) and subjects in computer-aided software engineering (CASE) such as project management, requirements modeling, data flow and entity relationship diagrams (DFD and ERD) and data dictionaries are among the included topics. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 2115  Business Analysis and Processes  4 Credit Hours

English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: CIS 1050 CIS 1060 CIS 1200 and CIS 2111.
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

In this course emphasis will be placed on tools and techniques to help with the analysis and process of solving business problems with technology. This course will cover process analysis, process flow diagrams, data analysis, predictive analysis and modeling, data modeling, Entity Relationship Diagrams (ERD), data dictionary, data mapping and the software tools available. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4
CIS 2120  Problem Solving and Information Technology       ....4 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: CIS 1050 and CIS 1060.
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.
This course demonstrates how information technology impacts organizations, with an emphasis on using information technology to solve problems and introduces the need for business processes and IT alignment. Topics include main concepts of information technology at a general level, on-line collaboration tools, application software, and information literacy as applied to searching and using the Internet. In addition, students will use application software at an intermediate level and apply it to problem solving scenarios. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2131  Python Programming  ....................... 4 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
The course will introduce the fundamental techniques and syntax for understanding, designing, constructing, debugging, and testing object-oriented programs using the Python programming language. The structured programming basics of process, selection and iteration will be covered as well as primitive and complex data typing, methods, parameters and input/output. Fundamental object-oriented concepts of classes, methods, abstraction, encapsulation and inheritance will also be introduced. Students will be required to complete computer-based assignments inside/outside of class. Students should have elementary algebra skills and be familiar with both elementary word processing and file management techniques prior to enrolling in this class. BILLABLE CONTACT HOURS: 4

CIS 2141  R Programming for Data Science       ....4 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: MAT 1150 or placement into a higher level math course.
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.
This course will teach students how to program in R for effective data analysis; how to install and configure software necessary for a statistical programming environment and describe generic programming language concepts as they are implemented in a high-level statistical language. The course covers practical issues in statistical computing which includes programming in R, reading data into R, accessing R packages, writing R functions, and debugging R code. Students will learn data structuring, transforming, visualizing, and modeling through hands on exercises. Students should be familiar with both elementary word processing and file management techniques prior to enrolling in this class. BILLABLE CONTACT HOURS: 4

CIS 2151  Object-Oriented Programming (Java)       4 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: CIS 1500
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.
Students will be exposed to more complicated programming problems and will study the techniques and structures used to solve these problems with the Java language. Topics will include exception handling, file input and output, composition, inheritance, polymorphism, abstract classes and interfaces. Advanced Graphic User Interface (GUI) design and implementation techniques will be covered. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 2212  Project Management  ..................4 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Students should be familiar with the basics of both word processing and Windows file management techniques before enrolling in this course. This course focuses on management strategies and analysis of business information systems projects. Project management issues and techniques specific to projects will be emphasized. Emphasis is on creating plans and implementing projects that are within budget, on time, and deliver useful results. Technology and project management standards, design tools (e.g., UML), product evaluation criteria, infrastructure integration, and communication of technical implementation details will be covered in group discussion and project work. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2232  Fundamentals of System Support       ....4 Credit Hours
Equivalent: DPR 2050
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Students will be introduced to the basic software and hardware concepts and facilities needed for simple support tasks. Topics covered include system boot sequences, disk partitioning, disk fragmentation, system configuration files, types of memory and memory management, basic OS commands and batch file construction. Emphasis is given to the Windows OS relationships and facilities. Hardware factors related to system and software evaluation, selection, purchase and installation are presented. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 2241  Discrete Structures  ....................4 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: MAT 1150 or placement into a higher level math course.
CIS 1500 or CIS 2131 or CIS 2151 or CIS 2252 or CIS 2656 or CIS 2757
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.
This course provides an introduction to discrete structures, covering topics such as mathematical logic, set theory, trees, matrices, and graphs, as they apply to computer science, data science, and software engineering. Programming applications of matrices as used in computer science will be covered. BILLABLE CONTACT HOURS: 4
CIS 2252  Object-Oriented Programming (C++)  .. 4 Credit Hours

English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Students should have a basic understanding of general programming concepts and techniques prior to enrolling in this class. Students will be instructed in the syntax and semantics of the ANSI C++ language. Topics covered include control structures, arrays, pointers, strings, dynamic memory management, class definition and object-based development, file I/O, overloading, exception handling, and template libraries. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 2313  E-Business and E-Commerce  ............ 4 Credit Hours

English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Students should have a basic knowledge of Internet technologies before enrolling in this course. Introduction is provided to a broad range of theories, practices, standards, and procedures related to the strategic implementation of e-commerce systems aimed at supporting one or more organizational business initiatives. A series of topics will be presented and cases analyzed that teach the student material ranging from: e-commerce business models, e-commerce technologies, supporting standards, to ecommerce analysis and design methodologies. The students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 2333  Web System Administration  ............ 4 Credit Hours

English/ESL Placement: Placement into ENG 1510.
Prerequisite: CIS 1300
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.
This course focuses on the operation and administration of Web application servers such as Apache HTTP, IIS, Tomcat and WebSphere. Students will study the basic structure and function of Web servers as well as the common tasks and services performed by administrators. Topics include Web protocols and related networking; Web server installation and configuration; integration with other essential services such as email, database management, file transfer, domain name services, and authentication; security; monitoring and performance; and virtualization. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2353  Data Structures  ......................... 4 Credit Hours
Equivalent: DPR 2810
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: CIS 1500 or CIS 2131 or CIS 2252 or CIS 2757
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.
Students will investigate the programming techniques and theories involved in implementing linked lists, queues, stacks and tree structures. Recursion, searching techniques and sorting algorithms will also be considered. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2434  Introduction to Linux and Unix Administration  ..... 3 Credit Hours
Equivalent: CIS 2332
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Students should be familiar with elementary word processing and basic computer concepts prior to enrolling in this course. This hands-on class covers the concepts related to Linux/Unix installation and system administration. Students will install and administer a Linux/Unix operating system using a virtual machine software product. It is intended for students who plan to work as Linux/Unix system administrators or for those who plan to take one or more certification tests as part of their professional preparation. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 3

CIS 2454  Web System Development (PHP, Java)  ..... 4 Credit Hours
Equivalent: CIS 1930
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: CIS 1500 or CIS 2151
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.
This course focuses on design and implementation techniques for Web-based application software. Server-side software design and development techniques associated with Web Developer job skills will be emphasized. Topics to be covered will include: Web application architecture; design patterns and application frameworks; PHP language basics; Java technologies for server-side Web development; database access; Extensible Markup Language (XML) and Asynchronous JavaScript and XML (AJAX)-based request processing; and Web application security. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2515  Database Design and Management with Oracle SQL  .................. 4 Credit Hours
Equivalent: DPR 2830
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: CIS 1200 or consent of instructor.
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.
This course will focus on design and management of database environments using Oracle SQL and associated Oracle technologies. Topics include enterprise information resource planning and object-oriented and entity-relationship data modeling methodologies, normalization and the relational model, logical and physical database design, and implementation, population and processing of a relational database for data access, report generation, database definition, data manipulation, and access control. Oracle-specific materials used in this course are designed to prepare students for an Oracle Database SQL exam which is the first exam required to become an Oracle Certified Associate or Oracle Certified Professional. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4
CIS 2535  Microsoft Windows Server Administration  ......3 Credit Hours

English/ESL Placement: Placement into ENG 1510 or ESL 2520.

Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

This course will focus on design and development of database applications using Oracle PL/SQL, Oracle development tools, and use of Oracle XML data types for implementation of PL/SQL programs, procedures, functions, packages, and triggers. Oracle-specific materials used in this course are designed to prepare students for the Oracle Program with PL/SQL exam which is the second exam required to become an Oracle Certified Associate or Oracle Certified Professional. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 2541  Introduction to Machine Learning  ......4 Credit Hours

Placement into ENG 1510 or ESL 2520.

Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

This course provides an introduction to fundamental machine learning topics in the context of data science. Students will learn fundamental examples and applications of machine learning, and types of machine learning systems, including supervised, unsupervised, semi-supervised, and reinforcement. Discussion of major challenges and solutions will be covered as well. BILLABLE CONTACT HOURS: 4

CIS 2567  Big Data and NoSQL Systems  ..........3 Credit Hours

Placement into ENG 1510 or ESL 2520.

Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

This course is focused on the architecture, design, implementation and support of Big Data systems and non-traditional information retrieval techniques (i.e. techniques that do not use structured query languages). Topics covered include: characteristics and analysis of big data; big data life cycle; big data platforms and highly distributed file systems; big data processing and storage technologies; and NoSQL. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2568  Network Administration  ...............4 Credit Hours

Placement into ENG 1510 or ESL 2520.

Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

This course is designed for Information Technology professionals who want to learn advanced topics in network administration. Areas covered include topics like routing protocols, congestion control algorithms, Quality of Service. The student will also be exposed to network security, trouble shooting networks, remote access technologies like VPN and some router switch configuration. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 2569  Microsoft Windows Server Administration  ......3 Credit Hours

Placement into ENG 1510 or ESL 2520.

Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

This course will focus on design and development of database applications using Oracle PL/SQL, Oracle development tools, and use of Oracle XML data types for implementation of PL/SQL programs, procedures, functions, packages, and triggers. Oracle-specific materials used in this course are designed to prepare students for the Oracle Program with PL/SQL exam which is the second exam required to become an Oracle Certified Associate or Oracle Certified Professional. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 2572  Database Administration ...............4 Credit Hours

Placement into ENG 1510 or ESL 2520.

Prerequisite: CIS 1200

Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

The purpose of the Database Administration course is to train students on typical activities performed by a database administrator (DBA) and on issues important to efficient performance of a database. The course will involve significant hands-on and lab work using the Oracle and/or MySQL server DBMS. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 2577  C# Programming  ...............4 Credit Hours

Placement into ENG 1510 or ESL 2520.

Prerequisite: CIS 1200

Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

This course focuses on the design and implementation of software using the C# programming language. Students will learn how to develop programs that utilize classes and objects, arrays, graphical user interfaces, event-driven programming and exception handling. Visual Studio .NET will be used as the primary integrated development environment. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2637  Big Data and NoSQL Systems  ..........3 Credit Hours

Placement into ENG 1510 or ESL 2520.

Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

This course is focused on the architecture, design, implementation and support of Big Data systems and non-traditional information retrieval techniques (i.e. techniques that do not use structured query languages). Topics covered include: characteristics and analysis of big data; big data life cycle; big data platforms and highly distributed file systems; big data processing and storage technologies; and NoSQL. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2636  Network Administration  ...............4 Credit Hours

Placement into ENG 1510 or ESL 2520.

Prerequisite: CIS 1300

Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

This course is designed for Information Technology professionals who want to learn advanced topics in network administration. Areas covered include topics like routing protocols, congestion control algorithms, Quality of Service. The student will also be exposed to network security, trouble shooting networks, remote access technologies like VPN and some router switch configuration. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 2616  Database Application Design and Development with Oracle PL/SQL  ..........4 Credit Hours

Placement into ENG 1510 or ESL 2520.

Prerequisite: CIS 2131, MAT 1580

Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

This course will focus on design and development of database applications using Oracle PL/SQL, Oracle development tools, and use of Oracle XML data types for implementation of PL/SQL programs, procedures, functions, packages, and triggers. Oracle-specific materials used in this course are designed to prepare students for the Oracle Program with PL/SQL exam which is the second exam required to become an Oracle Certified Associate or Oracle Certified Professional. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2635  Microsoft Windows Server Administration  ......3 Credit Hours

Placement into ENG 1510 or ESL 2520.

Prerequisite: CIS 1200

Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

This course will focus on design and development of database applications using Oracle PL/SQL, Oracle development tools, and use of Oracle XML data types for implementation of PL/SQL programs, procedures, functions, packages, and triggers. Oracle-specific materials used in this course are designed to prepare students for the Oracle Program with PL/SQL exam which is the second exam required to become an Oracle Certified Associate or Oracle Certified Professional. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2634  Introduction to Network Administration  ......3 Credit Hours

Placement into ENG 1510 or ESL 2520.

Prerequisite: CIS 1200

Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

This course is designed for Information Technology professionals who want to learn advanced topics in network administration. Areas covered include topics like routing protocols, congestion control algorithms, Quality of Service. The student will also be exposed to network security, trouble shooting networks, remote access technologies like VPN and some router switch configuration. Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4
CIS 2818  Mobile Application Development (Android) ......4 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: CIS 1500 or consent of instructor.
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.
This course focuses on the design and implementation of wireless handheld application software on the Android platform for business and personal use. Students will use the Android Studio integrated development environment (IDE) to develop and test application software. Development techniques will focus on operational aspects of mobile devices that distinguish them from PCs and general computing platforms. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2819  Mobile Application Development (iOS) ......4 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
In this course, students will learn how to write computer software using the SWIFT programming language that runs on Apple iOS-based mobile devices. Topics covered will include: the iOS platform execution environment; basic SWIFT language features such as data types, conditional statements, iteration, data collections, classes, functions, and error handling; user interface design and event-based processing; persistent data management; and integration with local and remote services. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2838  System Security .................................4 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: CIS 1600
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.
This course is designed for aspiring security professionals, system or network administrators, or other information technology professionals who want to learn about computer security. Being a part of two courses, this part focuses on the security engineer who needs to worry about the attacks used by hackers and the defenses against them. The course makes an effort to understand defenses against Reconnaissance, Scanning, Gaining Access, Maintaining access and covering tracks. Last but not the least, the course covers computer ethics. The Students will be required to complete computer-based assignments inside/outside of class. BILLABLE CONTACT HOURS: 4

CIS 2845  Computer Forensics ............................4 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: CIS 1600
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.
With ever growing reliance on computers for every day life projects, and increased focus on security and breach of security and privacy, there is a need for a course which can help security professionals and law enforcement agencies learn ways to investigate security breaches. This course is designed to introduce a variety of operating systems investigation techniques, incident response tactics, and legal issues. The course helps learn forensic techniques and tools for both Windows and Linux investigations. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2858  Web System Integration and Service Development .................................4 Credit Hours
Equivalent: CIS 2414
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: CIS 1500 or CIS 2151 or CIS 2454
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.
This course focuses on design and implementation strategies for integration of distributed client-server software and development of Web application services. Topics to be covered will include: Web middleware-related technologies such as the Java Enterprise Edition platform (Java EE), multi-tier application frameworks; Extensible Markup Language (XML) processing; Simple Object Access Protocol (SOAP); Representational State Transfer (RESTful) Web services; Web Services Description Language (WSDL); and Cloud Computing services. Students will use a popular IDE tool to create and integrate Web application components. Completion of computer-based assignments inside and outside of class will be required. BILLABLE CONTACT HOURS: 4

CIS 2859  Foundations of Game Software Development ......4 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Students should have a basic understanding of object-oriented programming prior to enrolling in this class. This course focuses on the fundamentals and techniques of game software development. Students will use a popular game engine and associated software tools to learn how various elements of games are created, integrated into a system, and used in game play. Game system elements include: game engine functions; scripts; graphical interface; models; terrains and worlds; textures; sound; and support infrastructure. Students will also apply mathematical foundations used in computer graphics. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 4

CIS 2862  Game Design .....................................3 Credit Hours
English/ESL Placement: Placement into ENG 1510 or ESL 2520.
This course is focused on the essential principles of designing game software. The philosophy of video games as a form of entertainment as well as important design concepts that feature player-centric approaches will be explored. Other topics to be covered include: the genres of games; design components and processes; game analysis frameworks; storytelling; creative and expressive play; character development; storytelling and narrative; game play mechanics; defining appropriate physical models and game worlds; and level design. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 3
CIS 2980  Computer Service Technologies & Techniques A
+  ................................................................. 4 Credit Hours

Equivalent: ECT 2150

English/ESL Placement: Placement into ENG 1510 or ESL 2520.

Prerequisite: CIS 2232 or consent of instructor.

Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

This course provides the necessary preparation to take the industry standard Core Hardware Certification exams. Topics studies include, but are not limited to: core hardware requirements, installation, configuration and upgrading, diagnosing and troubleshooting, preventive maintenance, motherboard/processors/memory, basic networking and security. Students will be required to complete computer-based assignments outside of class.

Note: certification exams are administered and charged separately by an outside agency. BILLABLE CONTACT HOURS: 4

CIS 2991  Special Project in Software Engineering  ....3 Credit Hours

English/ESL Placement: Placement into ENG 1510 or ESL 2520.

Prerequisite: Successful completion of all required core courses in the CIS.SWE.CT CIS Software Engineering Certificate program: CIS 1200 CIS 1500 CIS 1512 and CIS 2353. Complete a minimum of 6 credits in one focus area of the CIS.SWE.CT CIS Software Engineering Certificate program.

Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

This course is focused on development of material for a personal 'software' portfolio that may be used to support employment opportunity applications. Common tools and techniques used in work environments as well as typical workplace processes will be explored with the purpose of preparing students for employment as software developers. Students will be required to complete computer-based assignments inside and outside of class. BILLABLE CONTACT HOURS: 3
