

Supply Chain Management (SCM.BUS.AAS)

Supply Chain Management (SCM.BUS.ONL.AAS) - 100% Online

Associate in Applied Science

Business, Management, Marketing and Technology

The Supply Chain Management program is designed to provide a foundational study in the acquisition, distribution, management, planning, and delivery of goods and services. The program will expose students to a wide variety of industries and models. Emphasis on purchasing, procurement, manufacturing and logistics will challenge students to understand the process of turning raw materials into finished goods.

Graduating from this program does not automatically qualify the student for the Michigan Transfer Agreement (MTA) endorsement. Students in this program seeking MTA endorsement should work closely with an OCC counselor to identify courses from the MTA List for transfer purposes which apply to the endorsement and to degree requirements.
