Surgical Technology Courses

SUR 1500 Pharmacology for the Surgical Technologist .......................... 2 Credit Hours

English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: Acceptance into the Surgical Technology Program or consent of instructor.
Pre- or Corequisite: SUR 2410 or consent of instructor.

Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

This course introduces students to the medications used in the operating room. It emphasizes classification, administration, forms, methods, interactions, and desired effects of perioperative medications. Also covered is the role of the surgical technologist and their legal responsibility to deliver safe patient care when assisting the physician during procedures when pharmaceutical agents are administered. BILLABLE CONTACT HOURS: 2

SUR 2150 Clinical Practicum I ............................................. 4 Credit Hours

English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: Acceptance to the Surgical Technology Program and completion of SUR 2420 SUR 2430 and SUR 2450; or consent of instructor.

This course is designed to provide the surgical technology student with the opportunity to utilize knowledge and skills in the operating room setting. The course will allow the surgical technology student to function in the role of first scrub with assistance or first scrub solo under the direct supervision of a clinical preceptor in general, gynecological, urological, plastic reconstruction and ear, nose and throat surgical procedures. During this course, the students will transition into the specialties of orthopedic, neurological, peripheral vascular and thoracic surgical procedures. BILLABLE CONTACT HOURS: 2

SUR 2350 Clinical Practicum II ............................................. 4 Credit Hours

English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: Acceptance to the Surgical Technology Program and completion of SUR 2150; or consent of instructor.
Pre- or Corequisite: SUR 2440

Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

This course is designed to allow the surgical technology student continued implementation of skills in the operating room. Under the direct supervision of a clinical preceptor, the surgical technology student will function in the role of first scrub with assist or first scrub solo in general, gynecological, urological, plastic reconstruction and ear, nose and throat surgical procedures. During this course, the students will transition into the specialties of orthopedic, neurological, peripheral vascular and thoracic surgical procedures. BILLABLE CONTACT HOURS: 7

SUR 2370 Clinical Practicum III ............................................. 6 Credit Hours

English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: Acceptance to the Surgical Technology Program and completion of SUR 2150 and SUR 2350; or consent of instructor.
Pre- or Corequisite: SUR 2460

Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

This course is designed to allow the surgical technology student continued implementation of skills in the operating room. Under the direct supervision of a clinical preceptor, the surgical technology student will function in the role of first scrub with assist or first scrub solo in general, gynecological, urological, plastic reconstruction and ear, nose and throat surgical procedures. During this course, the students will transition into the specialties of orthopedic, neurological, peripheral vascular and thoracic surgical procedures and complete all case requirements as dictated by the Core curriculum of Surgical Technology. BILLABLE CONTACT HOURS: 9

SUR 2410 Foundations of Surgical Technology I .......................... 4 Credit Hours

English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: Acceptance to the Surgical Technology Program or consent of instructor.
Pre- or Corequisite: SUR 1500 or consent of instructor.

Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

This course is the first of two sequential courses designed specifically for entry-level job training. It is a combination of classroom studies and lab practice. The course is designed to offer experiences in the perioperative arena in order to prepare for competent and safe patient care. The essential components of the career of Surgical Technology will be introduced in course material and practiced in the lab setting. These elements include appropriate aseptic and sterile technique, the surgical scrubs, gowns, and gloves of self and others; identification of furniture, instrumentation and equipment, safe handling of sharps, set up of the sterile field, draping of the patient and surgical equipment, accurate surgical counts and proper passing of instruments. BILLABLE CONTACT HOURS: 4

SUR 2420 Foundations of Surgical Technology II ......................... 6 Credit Hours

English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: Acceptance to the Surgical Technology Program and completion of SUR 2410 or consent of instructor.
Pre- or Corequisite: SUR 2430 SUR 2450 or consent of instructor.

Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor's degree or higher from a U.S. institution.

This course is a continuation of the fundamentals taught in previous SUR 2410 Foundations I. During this course the emphasis is placed on patient safety and on the standards of care required for the surgical patient. The course instruction is a combination of classroom studies and lab practice. The course provides knowledge that includes preparation and maintenance of sterile and unsterile supplies, introduction to doctor's preference cards, positioning of the surgical patient, routine skin preparation, types of surgical incisions that provide optimum exposure for surgical procedures, types of wound closure techniques, dressings, drains, types of sutures, needles, and stapling devices, proper handling of medications on the surgical field, and factors influencing wound healing. BILLABLE CONTACT HOURS: 8
This course is designed to provide the surgical technology student with a basic understanding of diagnoses, regional anatomy and physiology, and the surgical instruments and equipment needed to provide optimum care in the most common and basic surgical procedures experienced in a surgical setting. This lecture and lab course develops concepts learned in the classroom and in the previous Procedures I course. The coursework will introduce students to the theory and the lab will initiate the practice of surgical interventions in multiple surgical services. The course also emphasizes the anatomy of the surgical patient and the steps required during a surgical procedure as well as the instrumentation of these surgical interventions. The fundamentals of numerous procedures are covered including the assessment of need for surgical intervention. The lab practice integrates mock surgery, simulation and basic and advanced clinical skills.

SUR 2440 Surgical Procedures II .......................... 6 Credit Hours

English/ESL Placement: Placement into ENG 1510 or ESL 2520.
Prerequisite: SUR 2420 SUR 2430 SUR 2450 or consent of instructor.
Pre- or Corequisite: SUR 2420 SUR 2430 SUR 2450 or consent of instructor.
Note: Prerequisites for courses in this department are not automatically waived for College Guest students and students with a bachelor’s degree or higher from a U.S. institution.

This course is designed to provide the surgical technology student with an advanced understanding of diagnoses, regional anatomy and physiology, and the surgical instruments and equipment needed to provide optimum care in the most common surgical procedures as outlined in the core curriculum and mandated by the accrediting body (ARC). This lecture and lab course develops concepts learned in the classroom and in the previous Procedures I and Foundations I courses. The coursework will further develop the knowledge of theory and lab components and strengthen the knowledge of surgical interventions. The course also emphasizes the anatomy of the surgical patient and the steps required during a surgical procedure as well as the instrumentation for these surgical interventions. The fundamentals of multiple procedures are covered including the assessment of need for surgical intervention. The lab practice integrates mock surgery, simulation and basic and advanced clinical skills.
